Synthetic fused refractory grains in tons ..	3,500	..
Calcined bauxite in tons ..	..	30,000
Electrocast refractories in tons ..	3,000	2,000

The company has obtained a Letter of Intent for the manufacture of 5000 tonnes per annum of silicon carbide with an export obligation.

CAPITAL : Authorised : Rs. 7,00,00,000 in 7,00,000 Equity shares of Rs. 100 each. **Issued and Subscribed :** 3,02,10,000 Equity shares of Rs. 100 each fully paid. (Of the above 12,000 shares were allotted as fully paid-up pursuant to contracts without payment being received in cash ; 1,96,100 shares were allotted as fully paid-up Bonus shares by capitalisation of Share Premium and General Reserve).

In 1977, 1,00,700 Equity shares were issued as Bonus at 1 : 2 to holders as on 6th June 1977.

Date of Accounts: 31st August. **Transfer, Sub-division/New Certificate fee :** *Nil.*

Dividend declared : 1982—20%, 1981—20% 1980—19%.

M/s. Eastern Abrasives Ltd. is a wholly owned subsidiary company. Necessary steps are being taken for the implementation of the Letter of Intent for the manufacture of 500 tpa of ceramic fibres. A new company Murugappa Morganite Ceramic Fibres Ltd., has been registered to implement the project with technical & financial collaboration from Morganite Ceramic Fibres Ltd. U.K.

The company is no longer covered by the Foreign Exchange Regulation Act. Since Carborundum Company, Inc. USA, one of the company's two overseas associates had offered for sale in November 1982 their entire holding of 83,232 Equity shares. With this, the non-resident equity holding in the company is well below 40%.

CEMINDIA

MAKES ANY GROUND A FIT PLACE TO BUILD ON

Our SPECIALIST Techniques include:

- *Pile Foundations*
- *Land/Marine Subsoil Investigation*
- *Ground Improvement by Vibroflotation*
- *Ground Consolidation by Sandwicks*
- *Diaphragm Walls*
- *Port and Harbour Structures*
- *Development of Mines by Shaft Sinking, Drivages, Raise Boring*
- *Strengthening of Dams*
- *Drillling, Grouting, Guniting, Colcreting*
- *Ground Anchors*
- *Lining of Canals under Flowing Conditions*
- *Pipe/Box Jacking under Rail/Road Embankments without Disturbing Overhead Traffic.*

CENKA PLASTICS
DIVISION OF CENTURY ENKA LTD.
presents
arnite®
Thermoplastic Polyester
and akulon® Nylon 6
India's most versatile Engineering Plastics

Name your industry ... electronic or electrical ... automotive or bicycle ... mechanical or chemical ... railways or defence ... rods or tubes ... zip fasteners or strappings ... biaxially oriented polyester films or PETP bottles ... multilayer films or laminates ... blow moulding, injection moulding or extrusion ... Cenka Plastics offers you the most advanced unfilled and glass filled engineering plastics in the world, manufactured with technical know-how from Akzo Plastics bv, Holland ... world leaders in their field.

FREE ADVISORY SERVICE

Come to Cenka Plastics today and ask about AKULON and ARNITE. We will be only too happy to help you, by providing you with advice and guidance at no cost or obligation. Ask us about material selection, moulding, extrusion, product design, testing or anything else you'd like to know.

Growth
a means not an end

At DLF, growth is not an end by itself. But a means to achievement. To a commitment that is shared by the people who man the corporation. An aspiration to contribute in their own little way to happiness & growth.

Its real estate division, DLF United, looks back to its pioneering effort in extending Delhi's boundaries. South Extension, Greater Kailash—I & II, Hauz Khas—a host of prestige residential colonies owe their existence to its indefatigable determination. A fire that still burns as DLF prepares to bring more land and housing within reasonable reach of the common man who is embattled by skyrocketing prices.

American Universal, its manufacturing division gears itself to setting entrepreneurs in business by building special FHP motors for a growing range of new appliances. Atta chakkis in Gujarat, wet rice grinders in the South, desert coolers in the North, air conditioners, computers etc. etc. . . . And a range of useful consumer durables. Ceiling fans, mini fans, cooler pumps & cooler fans.

A diverse spectrum. A broad vision bound together by its common objective of ceaseless striving for perfection and growth. Meaningful growth.

DLF UNIVERSAL LIMITED
Striving for meaningful growth

ELECTRONICS LTD.

FOUNDED in 1945. **Directors :** J. Desai (*Chairman*), D. S. Mulla, L. N. Dadabhoy and M. A. Sreenivasan. **Registered Office :** Atmaram House, 7th Floor, 1, Tolstoy Marg, New Delhi-110 001. **Works :** 26, N. I. T., Faridabad. Telegram : 'ARCTIC'. Telephones : 382001, 382003. **Auditors :** Messrs. Raghunath Rai & Co., and **Cost Auditors :** Messrs. R. Nanabhoy.

Objects and Activities : Manufacture of various kinds of electrical and electronic goods, public address systems, room coolers, air conditioners, bottle coolers, room heaters, voltage regulators, heat convectors, geysers, ice making machines, F. H. P. Motors, exhaust Fans, and milk chilling units.

CAPITAL : Authorised : Rs. 50,00,000 in 5,00,000 Equity shares of Rs. 10 each. **Subscribed, Called and Paid-up :** Rs. 38,26,340 in 3,82,634 Equity shares of Rs. 10 each fully paid-up.

Date of Accounts : 31st December. **Registration Fee :** *Nil.*

ELECON ENGINEERING COMPANY LTD.

INCORPORATED as a private company in 1960 and converted into a Public Company in 1961. **Directors :** Bhanubhai I. Patel (*Chairman and Managing Director*), R. Vithaldas, B. P. Patel, J. R. Shah, P. M. Patel, M. G. Doshit, Y. H. Malegam, U. M. Patel, M. H. Prasad and M. C. Patel (*Technical Director*). **Secretary :** S. R. Patel. **Registered Office :** Vallabh Vidyanagar-388 120, Gujarat. Telegram : 'ELECON'. Telephones : 12, 38, 49, 87 and 89 (Vallabh Vidyanagar). Telex : 012-290. **Auditors :** Messrs. Thakorebhai-Shirish Desai & Butala.

Objects and Activities : Manufacture of elevators, conveyors, gears, feeders and screens. The company has foreign collaboration with (i) M/s. Alfred Wiseman & Company Limited, England. (ii) Messrs. Spencer Melksham Limited. (iii) Messrs. Richard Sutcliffe Engineering Systems Limited, England. (iv) Messrs. Strachen and Hensaw Ltd., England. (v) Messrs. Schuchtermann and Kremer Baum Gmbh, West Germany.

Messrs. Chitraj Engg. Co. Ltd. is a subsidiary.

CAPITAL : Authorised ; Rs. 3,00,00,000 divided into 2,50,000—Equity shares of Rs. 100 each, and 24,000—9.8% Cumulative Redeemable Preference shares of Rs. 100 each, and 26,000 Unclassified shares of Rs. 100 each. **Issued, Subscribed and Paid-up ;** Rs. 1,86,00,000 divided into 1,62,000 Equity shares of Rs. 100 each fully paid-up and 24,000—9.8 per cent Cumulative Redeemable Preference shares of Rs. 100 each.

Notes ; Of the above (i) 6,824 Equity shares have been allotted as fully paid-up pursuant to a contract without payment being received in cash ; and (ii) 54,000 Equity shares of Rs. 100 each have been issued as Bonus shares by way of Capitalisation of Reserve.

Date of Accounts : 31st December.

ELECTROSTEEL CASTINGS LTD.

ESTABLISHED in 1955 at RAJGANPUR. **Directors :** G. Kejriwal (*Chairman*), B. Khaitan, P. K. Khaitan, P. L. Pasricha, Raj Kumar Seth (*Nominee* of ICICI). U. Kejriwal (*Managing Director*), M. Kejriwal (*Joint Managing Director*), **Secretary :** S. Y. Rajagopalan. **Registered Office :** Rajgangpur, Orissa. **Administrative Office :** Stephen House, 4, B.B.D. Bagh (East,) Calcutta-700 001. Telephone : 234071 (10 lines). **Auditors :** Messrs. Lodha & Co.

Objects and Activities : Manufacture of steel castings, hyper steel/high chrome steel grinding media, steel ingots/billets, spun iron pipes, C.I. Specials. The works are situated at Khardah in West Bengal, Ghaziabad in UP and Elavur in Tamil Nadu.

Capacity (tonnes)	*Licensed*	*Installed*
Steel Castings	3,600	3,600
Grinding media ..	21,000	21,000
Steel ingots (Khardah)	..	18,000
Steel ingots/billets ..	36,000	36,000
Spun iron pipes ..	1,25,600	1,25,600
C.I. Specials ..	14,400	14,400
C.I. Castings ..	5,000	5,000

The company has purchased an existing spun pipe unit (Sakthi Pipe Unit) at Elavur near Madras and carried out repairs and replacements necessary to put the unit into operation. A technical collaboration agreement in the field of spun pipe has been entered into with Lintpoldhutte AG, West Germany and the agreement has been approved by the Central Government. The company has established separate independent facilities at Khardah for manufacturing high chrome alloy steel grinding media. Establishment of a new unit near Madras for grinding media is also under consideration.

CAPITAL : Authorised : Rs. 5,00,00,000 in 50,00,000 shares of Rs. 10 each. **Issued and Subscribed :** Rs. 80,00,000 in 8,00,000 Equity shares of Rs. 10 each fully paid-up.

Date of Accounts : 30th June. **Transfer Fee :** *Nil.* **Split** or **New Certificate Fee :** Re. 1 per certificate.

Dividend declared : 1983—30 per cent, 1982—30 per cent, 1981—20 per cent, 1980—25 per cent, and 1979—20 per cent.

GUJARAT MACHINERY MANUFACTURERS LTD.

INCORPORATED in 1962. **Directors :** J. V. Patel (*Chairman*), R. L. Dalal, A. J. Patel, J. J. Metha, Indravadan Pranlal, M. V. Shah (ICICI *Nominee*), R. D. Shah, Vithallbhai P. Amin. **Secretary :** N. G. Thaker. **Registered Office :** P. B. No. 1, Vithal Udyognagar, Karamsad 388 325, Gujarat State. Telephone : 7024, 7120, 7124. Telex : 0172-204 Telegrams : 'SUDHALIN' **Auditors :** Messrs. Shah & Co. Kantilal Patel & Co.

Objects and Activities : The company is engaged in the manufacture of enamelled acid and alkali resistant chemical equipment consisting of autoclaves, distilling plant and evaporating pans, structural steel works including tanks, chimneys, durtings and conpolas, mild steel equipment viz. reaction vessels, storage tanks, absorption towers, driers, heat exchangers, fractionation towers, condensors, durtings, blenders and pressure vessels, stainless steel equipment, hydrogen gas generating plants, distillation equipment, evaporator and driers, continuous type of solvent extraction plant etc. The company also operates an electrical instrumentation division manufacturing wall clocks, poly phase and single phase meters, iron clad switches and distribution box and boards.

The engineering plants are at Karamsad and Bombay, Electrical Instrumentation Division is located at Ahmedabad.

The company has a proposal for collaboration arrangement with De Detrich, France.

CAPITAL : Authorised : Rs. 1,00,00,000 in 50,000 Equity shares of Rs. 100 each, 8,000—9.5 per cent Redeemable Cumulative 'A' Preference shares of Rs. 100 each and 42,000 Unclassified shares of Rs. 100 each. **Subscribed :** Rs. 47,90,800 in 40,000 Equity shares of Rs. 100 each fully paid, *less:* calls unpaid Rs. 4000, 5500—9.5 per cent Redeemable Cumulative 'A' Preference shares of Rs. 100 each fully paid-up in cash and 2448 Equity shares of Rs. 100 each reserved for allotment (without payment being received in cash) in terms of the Scheme of Amalgamation of Electrical Instruments Mfg. Co. with the company.

Issue of 21,224 Bonus shares of Rs. 100 each in the proportion of one Bonus share for every two existing Equity shares has been recommended.

Date of Accounts : 30th September. **Transfer Fee :** *Nil.* **Sub--division, New Certificate Fee :** *Nil.*

Dividend declared : 1983—12.5 per cent, 1982—15 per cent, 1981—17.5 per cent, 1980—15 per cent.

Electrical Instrument Manufacturing Co. (sick unit) has been amalgamated with this company vide Gujarat High Court Order dated 24-4-1981.

HINDUSTAN SHIPYARD LTD.

(A Government of India Undertaking)

Directors : Rear Admiral K. R. Menon (*Chairman and Managing Director*), A. Padmanaban, S. S. Shukla, D. Jayachandran, T. R. Prasad, A. K. Sarkar and B. N. Jayasimha. **Secretary :** G. V. Gopala Rao. **Registered Office :** Room No. 412-A, Transport Bhavan, 1, Parliament Street, New Delhi-110 001. **Shipyard Office :** Gandhigram, Visakhapatnam-530 005. **Auditors :** Messrs. Narasimharao & Associates and Messrs. Sankaran & Krishnan.

The shipyard at Visakhapatnam was built and operated initially by the Scindia Steam Navigation Company Limited. The Government of India's Hindustan Shipyard Limited came into existence in 1952 when the Government of India acquired two-thirds of the shares. In July 1961, the shares held by the Scindia's were also acquired by the Government of India and since then Hindustan Shipyard has been fully owned and managed by the Government of India. The Company embarked upon a development programme with the aid of French firm of consultants, M/s. Societ's Anonyme Des Atolios to Chantiers de la Leire, Paris. Since the expiry of the agreement in July 1958, the shipyard is manned entirely by Indian personnel.

The shipyard has four large building berths, served adequately by cranage facilities, a well-equipped machine-shop, plumbing shop, foundry, a modern galvanising plant, an electrical shop, a modern tool room and vast covered area for storage of materials. The shipyard now has the capacity to build all types of general cargo vessels upto 18,000 DWT and bulk-carriers/tankers upto 30,000 DWT Naval vessels, oceanographic survey vessels, big trawlers, supply vessels, harbour craft of various types and other specialised vessels. The capacity of the yard may be reckoned at 3 ships per annum.

The yard has so far built and delivered 78 ships aggregating to about 8,03,306 DWT 5,53,656 G.R.T., including oceangoing cargo liners, a sophisticated Naval survey vessel, a modern training ship, two passenger ships and miscellaneous crafts.

The Drydock commissioned in 1971, is the biggest of its kind in India in its principal dimensions and docking capacity. Hindustan Shipyard has embarked upon ambitious plans of modernisation and expansion since 1969. The first phase, styled as integrated Development programme at an estimated cost of Rs. 6.09 crores is nearing completion. The second phase styled as stage-I of Development at an estimated cost of Rs. 3.66 crores, is on hand. The yard's capacity is expected to increase to 7/8 ships per annum at the completion of the next phase, styled as Stage-II of Development, at an estimated cost of Rs. 36 crores. The Wet Basin was commissioned in March 1976.

CAPITAL : Authorised : Rs. 25,00,00,000 in 2,50,000 Equity shares of Rs. 1,000 each. **Issued, Subscribed and Paid-up Capital :** Rs. 20,93,37,000 in 2,09,337 Equity shares of Rs. 1,000 each fully paid-up. (Of the above shares 27,285 shares were allotted as fully paid-up, pursuant to contracts without payment being received in cash).

Date of Accounts : 31st March.

HMT LTD.

Directors : T. V. Mansukhani (*Managing Director*), H. M. S. Bhatnagar, S. Kanungo, G. Lakshminarayanan, I. K. Amitha, Dr. P. K. Chaudhuri, G. V. Appa Rao, N. Swaminathan. **Secretary :** M. B. Ramu. **Registered Office :** 36, Cunningham Road, Bangalore-560 052. **Auditors :** Messrs. K. V. Narasimhan & Co.

Objects and Activities : Manufacture of machine tools, milling machines, radial drills, column drills, multi spindle drilling machines, grinders, gear cutting machines, boring machines, broaching machines, CNC lathes, metal forming, die casting and plastic moulding, electro machines, agricultural machineries, watches, lamps, dairy machinery etc.

A separate unit for the manufacture of silver oxide batteries required for electronic watches is being set up at Patagaon in Assam in technical collaboration with Messrs. Hitachi-Maxell of Japan. Stepper Motor project is being set up at Tumkur, Karnataka and commercial production is expected to commence shortly. Government has approved the proposal for setting up a production facility for measuring and control systems in collaboration with Messrs. Federal Products Corporation of U.S.A. The printing machinery division at Kalamassery manufactures letter press and single colour offset printing machines. The Feeder Units collaboration with Messrs. Mabeg of West Germany for feeder units for sheetfed offset printing machines is under implementation.

CAPITAL : Authorised : Rs. 50,00,00,000 in 5,00,000 Equity shares of Rs. 1,000 each. **Issued, Subscribed and Paid-up :** Rs. 37,31,50,000 in 3,73,150 Equity shares of Rs. 1,000 each. (Of the above shares 47,122 shares are allotted as fully paid-up without payments being received in cash).

Date of Accounts : 31st March.

Dividend declared : 1983—6 per cent.

Messrs. HMT (International) Ltd., HMT Bearings Ltd. are the subsidiaries.

KELTRON

KELTRON builds the edifice of microcomputer technology through the introduction of structured hardware, software, and support systems. The productions under-development and production include.

- * VDUs (DUMP AND INTELLIGENT)
- * Data Entry Systems (Off-line, On-line, Multi-user)
- * Desk Top Computers
- * Micro-Minicomputers (For business and real-time applications)
- * Data Capture Systems
- * Traffic Control Systems
- * Dataloggers (Temperature Scanners, Sequential Events Recorders)
- * Minicomputer-based Data Acquisition Systems
- * Programmable Controllers
- * Distributed hierarchical monitoring and control structure.

KIRLOSKAR BROTHERS LTD.

INCORPORATED in 1920 at KIRLOSKARWADI, Dt. Satara, Maharashtra. **Directors :** S. L. Kirloskar (*Chairman*), C. S. Kirloskar (*Vice-Chairman*), S. B. Kher, V. S. Shirgaokar., V. R. Dafle, Lt. Gen. SPP Thorat (Retd.) A. B. Pant., Jayant N. Gurjar, M. S. Kirloskar, P. M. Mane, S. Y. Gupte. **Secretary :** K. S. Bhat. **Registered Office :** Udyog Bhavan, Tilak Road, Pune-411 002. Telephone : 27384. Telegrams : 'KIRLOSKAR'. **Auditors :** Messrs. P. G. Bhagwat.

Objects and Activities : Manufacture of agricultural implements, power-driven pumps, sugarcane crushers, centrifugal pumps, shrine valves, concrete mixers, decorticators, machine tools, vertical turset lathes, alloy iron, steel and cast iron castings, boring machines, hydraulic power transmitting and controlling equipment and so on.

The works are situated at (i) Kirloskarwadi, Dist. Sangli (ii) Karad Dhebewadi Road, Dist. Satara (iii) Veer Savarkar Nagar, Pune (all in Maharashtra) and (iv) Dewas in Madhya Pradesh.

Capacity	*Licensed*	*Installed*
Power driven pumps (Nos.)	1,94,000	1,94,000
Vertical turret lathes (Nos.)	36	36
Key-way milling machines (Nos.)	72	72
Drilling machines (Nos.)	300	300
Shaping machines (Nos.)	288	288
Reduction gear units (Nos.)	1,200	1,200
Valves	70,070	70,070
Sugarcane crushers	2,200	2,200
Ploughs	3,216	3216
Hermetic sealed compressor units	1,00,000	1,00,000
Pressure flow direction control sliced valves	1,00,000	1,00,000
Hydraulic motors	10,000	under implementation
Hydraulic pumps	10,000	

CAPITAL : Authorised : Rs. 7,00,00,000 in 50,00,000 Equity shares of Rs. 10 each and 8,00,000 Preference shares of Rs. 25 each. **Issued :** Rs. 3,35,09,650 in 31,00,965 Equity shares of Rs. 10 each and 1,00,000—9.5 per cent Redeemable Cumulative Preference shares of Rs. 25 each. **Paid-up :** Rs. 3,32,00,033 in 30,68,995 fully paid Equity shares of Rs. 10 each, *less* : Calls in arrears Rs. 10,549 ; 1,00,000—9.5 per cent Redeemable Cumulative Preference shares of Rs. 25 each, add : amount paid-up on Forfeited shares Rs. 10,803 (Of the above 33,000 Equity shares of Rs. 10 each have been allotted as fully paid-up pursuant to a contract without payment being received in cash. 15,83,522 Equity shares are allotted as fully paid Bonus shares by capitalisation of part of General Reserve).

Equity shares were sub-divided during 1983. Shares of original face value Rs. 25 were converted into equivalent shares of Rs. 10 each.

Date of Accounts : 31st July.

Dividend declared : 1984—10 per cent, 1983—12 per cent, 1982—12 per cent, 1981—15 per cent and 1980—13.5 per cent.

The company has collaborative ventures in U.K., U.S.A., Kenya and Mauritius. Hydrodyne Ltd., Mauritius, manufactures pumps. Kirloskar Kenya Ltd., is a trading venture. SPP International Ltd., U.K. and SPP Inc. USA are the other joint ventures. Hydrodyne Ltd. has set up a non-ferrous foundry project.

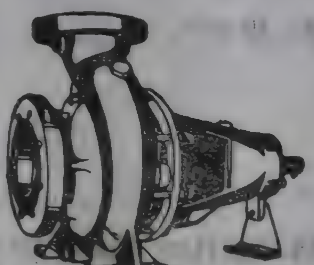
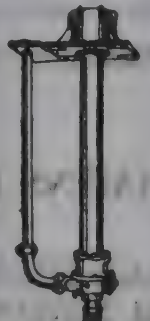
and Process Industries

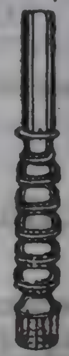
Back pullout pump
Type DB
Working pressure up to
16.0 kg/cm² and temperature 95°C
Heads up to 110 M
Capacity Up to



Vertical wet pit nonclog sump pump
Type NKS
Heads up to 36 M
Capacity :
Up to 840M³/Hr

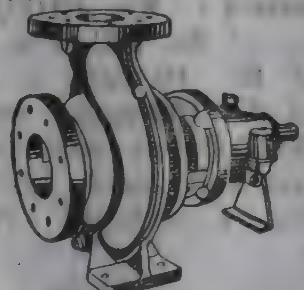


Vertical turbine pump
Type BHR
Heads up to 300 M
Capacity :
Up to 2200 M³/Hr

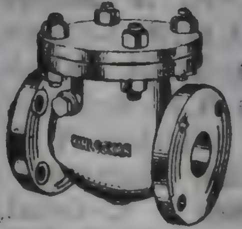


Process pump
Type KPDS
Heads up to 50 M
Capacity . Up to 70 M³/Hr

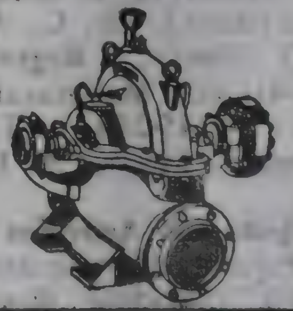
Back pullout process pump
Type KPD
Pressure up to 40 kg/cm² and
temperature – 30° to 350°C
Heads up to 150 M
Capacity : Up to 360 M³/Hr
As per DIN 24256



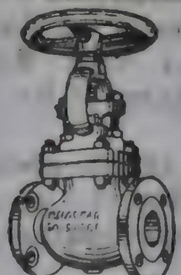
Check Valve
Sizes : 50 to 200 mm
To BS 1868 class 1500



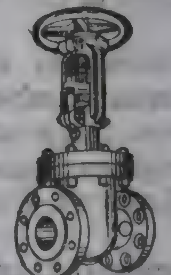
Single stage double suction horizontal split casing pump
Type UP/UPL/UPH
Heads up to 80 M
Capacity :
Up to



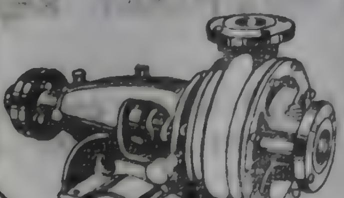
Globe Valve
Sizes : 50 to 200 mm
To BS 1873 class 150 and 300



Gate Valve
Sizes : 50 to 350 mm
To API 600 class 150 and 300



End suction process pump
Type PCE/PCH
Heads up to 68 M
Capacity : Up
As per DIN 24256 to 97 M³/Hr



Solids handling pump
Type SH
Heads up to 90 M
Capacity .
Up to 800 M³/Hr

KIRLOSKAR CUMMINS LTD.

INCORPORATED in 1962. **Directors :** C. S. Kirloskar (*Chairman and Managing Director*), Arun Kirloskar (*Vice-Chairman*), R. B. Stoner, R. S. Campbell (*Alternate Director*), H. B. Schacht, J. T. Hackett (*Alternate Director*), M. H. Walsh, W. H. Draeger (*Alternate Director*), B. H. Reporter, D. P. Mehta, H. M. Kothari, Air Marshall Y. V. Malse (Retd.), Dr. C. A. Paalnikar. **Secretary :** V. G. Shetty. **Registered Office :** Kothrud, Pune-411 029, Maharashtra. Telephones : 55251-2. Telex : 0145-244. Telegrams : 'CUMKIRK'. **Auditors :** Messrs. A. F. Ferguson & Co.

Objects and Activities : The company manufactures and otherwise deals in internal combustion engines, including diesel engines reciprocating piston engines, gas turbine engines, gasoline engines etc. The works are at Kothrud, Pune.

Licensed Capacity : Internal combustion engines (60-1600 HP)—6400 Nos.

The company obtained a limited licence for the manufacture of 500 (Neoplan) buses in collaboration with Gottlob Auwarter GmbH. West Germany. The company also proposed to buy land and buildings in Pune for starting a foundry. Licence application was made for the manufacture of 15,000 trucks per year in collaboration with Hungarian Railway Carriag and Machine Works (RABA). Messrs. Cummin Engine Co. Inc., USA. and Messrs. Hois Engineering Co. Ltd., UK are the collaborator for the manufacture of engines and turbocharger respectively.

CAPITAL : Authorised : Rs. 10,00,00,000 i 8,40,000 Equity shares of Rs. 100 each, 7,00,00 Preference shares of Rs. 10 each and 90,00 Unclassified shares of Rs. 100 each. **Issued an Subscribed :** Rs. 7,30,00,000 in 6,60,000 Equit shares of Rs. 100 each fully paid, 7,00,000—1 per cent Redeemable Cumulative Preferenc shares of Rs. 10 each.

Of the above Equity shares, 5,10,000 shares a allotted as fully paid Bonus shares b capitalisation of Reserves.

Date of Accounts : 30th September. **Registrati Fee :** *Nil.*

Dividend declared : 1983—25 per cent, 1982— per cent, 1981—25 per cent and 1980—20 pe cent.

Messrs. Cummins Sales and Service (Indi Ltd. is a subsidiary of the company.

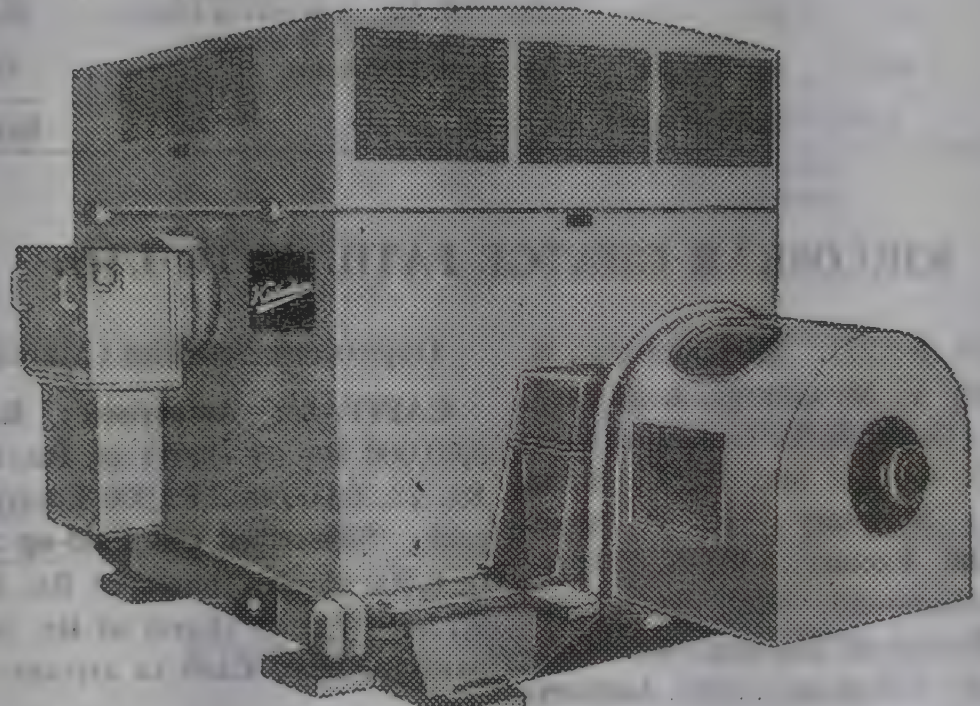
Kirloskar Electric now offers Higher Range AC Motors up to 3000 kW

in technical collaboration with NEI Peebles Ltd., U.K.



Kirloskar Electric presents a solution to all drive problems—Unit Type Standardised Paricon Range Induction Motors.

The Paricon Range of AC Motors are designed for arduous and demanding applications in core industries like Steel, Cement, Chemical, Fertilizer, Petro-Chemical, Refineries and Thermal Plants, Geared to operate efficiently in varied environmental conditions, these motors drive loads like Pumps, Compressors, Fans, Crushers, Conveyors, Ball Mills, etc.

KEC's engineering expertise and reputed after-sales service guarantee reliable performance.

Range: 100 to 3000 kW
375 to 3000 rpm
415, 3300, 6600, 11000 Volts.

Squirrel Cage Motors
Slip-ring Motors
Industrial or fully certified Motors with Type of protection Ex 'e' or Ex 'n'

Converting energy to serve the millions

KIRLOSKAR OIL ENGINES LTD.

INCORPORATED in 1946. **Directors :** S, L. Kirloskar (*Chairman and Managing Director*), C. S. Kirloskar (*Vice-Chairman*), G. G. Bewoor, J. N. Gurjar, J. R. Joshi, J. P. Kacker, S. B. Kher, H. M. Kothari', A. B. Pant, P. G. Pawar, Dr. R. J. Rathi. **Secretary :** P. R. Naware. **Registered Office :** Laxmanrao Kirloskar Road, Khadki, Pune-411 003. Maharashtra. Telephone : 55341. Telex : 0145-245. Telegram : 'KOEL-Pune. **Auditors :** Messrs. Dalal & Shah.

Objects and Activities : Manufacture and sale of internal combustion diesel engines, bimetal bearings and bushes. The factories are situated at Pune & Ahmednagar.

Licensed Capacity :

Engines (3-650 HP)—7,25,000 HP.
'R' type engines—20,000 Nos.
Bimetal bearings—12 million Nos.
Bimetal strips—800 MT.
Stationary diesel engines (500-3550 HP) (in cylinders) : 500 Nos.

The company has collaboration arrangements with Societe D'Etudes De Machines Thermique (SEMT), France, for the manufacture of high HP diesel engines and with Glacier Metal Co. Ltd., UK, for the manufacture of bearings. The company has been appointed by Alsthom Atlantique of France to represent them in India for selling Pielstick engines manufactured by them in France. The proposal for the manufacture of fuel injection systems in collaboration with Ambac Industries Inc. USA, is awaiting clearance, fror Central Govt.

CAPITAL : Authorised : Rs. 15,00,00,000 in 1,00,00,000 Equity shares of Rs. 10 each and 50,00,000 Preference shares of Rs. 10 each. **Issued :** Rs. 6,90,00,000 in 11,50,000—11 per cent Redeemable Cumulative Preference shares of Rs. 10 each fully paid and 57,50,000 Equity shares of Rs. 10 each fully paid. **Subscribed :** Rs. 6,70,50,000 in 9,55,000—11 per cent Redeemable Cumulative

Preference shares of Rs. 10 each fully paid, and 57,50,000 Equity shares of Rs. 10 each fully paid. (Of the above, 5000 Equity shares of Rs. 10 each were issued to vendors as fully paid as per agreement without payment being received in cash and 44,47,500 Equity shares issued as bonus by capitalisation of General Reserve and Share Premium.

Date of Accounts : 30th June.

Dividend declared : 1983—15 per cent, 1982—10 per cent, 1981—15 per cent, 1980—12.5 per cent.

Messrs. Shivaji Works Ltd. and Kirloskar Kisan Equipment Ltd. are subsidiaries of the company.

KIRLOSKAR TRACTORS LTD.

INCORPORATED in 1970. **Directors :** S. L. Kirloskar (*Chairman*), C. S. Kirloskar, P. D. Gune, Lt. Col. F. P. Gaekwad, J. Y. Tekawade, V. B. Kirtane, G. A. Shah, V. P. Pandit, H. M. Kothari, Apa B. Pant, A. K. Sarkar (IDBI *Nominee*), A. C. Mukherji, (ICICI *Nominee*) and Shreekant S. Kirloskar (*Managing Director*). **Secretary :** M. R. Joag, Sr. Vice-President—Secretary. **Registered Office :** Hadaspar Industrial Estate, Pune-411 013. Telephone : 70133 (Administration), 70341 (Marketing, Finance and Materials). Telex : 0145-246, 0145-306. Telegram : 'SANJAY'. **Auditors :** Dalal & Shah & P. G. Bhagwat.

Objects and Activities : The company manufactures compressed air gas equipment, air-conditioning & refrigeration equipment and power transmission equipment. The factories are situated in Nasik (Tractor division) and Pune (Pneumatic division).

Products	*Licensed Capacity* (Nos.)
Tractors	10,000
Air Compressors	2,736
Air & gas compressors (high & capacity & heavy duty)	60
Gas compressors (high pressure)	40
Air compressors (high pressure)	50
Rock Drills	1,800
Sump Pumps	240
Pneumatic tools	2,832
Rock drill rods	50,000
Refrigeration compressors, condensers etc.	1,200
Compressors & components for refrigeration & air conditioning units	2,400
Air-conditioning & refrigeration equipment for transport	600
Power transmission equipment (Torque converters)	2,400
Reverse reduction gears for marine gear engines	900
Reverse reduction gear units	1,000
Controllable pitch propellers and standard propellers	200
Fluid couplings	750

Most of the Plant and Machinery being common for different products manufactured by the company and installed capacity being dependent on Product Mix, which in turn is decided by the actual demand for various products from time to time, and also on availaing of sub-contracting facilities, it is not feasible for the company to indicate the exact installed capacity. The Company has collaboration arrangement with (1) Messrs. Klockner Humboldt Deutz-AG, West Germany for tractors, (2) Messrs. Broom & Wade Limited, England for the manufacture of air compressors, pneumatic tools and rock drills (3) Messrs. Grasso's Koninklijke Machinefabrieken N.V., Netherlands for refrigeration compressors (4) Messrs. Grasso Stacon B.V. Netherlands for air-conditioning compressors, (5) Messrs. Westinghouse Electric International Company, New York for compressors & components for refrigerataion and air-conditioning units, (6) Messrs. Westing house Bake & Signal Co., London for air brake compressors, (7) Messrs. Twin Disc Incorporated Racine, USA for power transmission equipment and marine gears (8) Messrs. Westinghouse Air Brake Co., USA for WABCO compressors, (9) Messrs. Hitachi Ltd. for centrifugal refrigerating machines and components and air & gas compressors (10) Messrs. Sutrak Transport Kalate, GmbH & Co. KG, West Germany for transport refrigerating & air-conditioning units, (11) Messrs. Voith Getriebe KG, West Germany for 700 HP Forward Reverse Turbo Transmission type L4r2U/U2 (for locomotive), 900 HP (type L4r4zU2) and Axle Drive types E-17 & V-17.

CAPITAL : Authorised : Rs. 10,00,00,000 in 1,00,00,000 Unclassified shares of Rs. 10 each. **Paid-up :** Rs. 3,85,27,000 in 38,52,700 Equity shares of Rs. 10 each.

Date of Accounts : 30th Sepetmber.

Dividends declared : 1983—10 per cent.

The erstwhile Kirloskar Pneumatic Co. Ltd. was amalgamated with the company on 1st November 1983 pursuant to the order of the High Court, Bombay.

Building new life into machines

In the span of four years Easun Machine Tool Works has built a name for itself by rebuilding machines. From Lathes to Grinding machines, the factory at Tiruninravur has the infrastructure to take on any reconditioning job, including retro-fitting old machines with CNC units.

Today over 100 machines have been restored to 90-100% of their original accuracy, at a fraction of their replacement cost. A tremendous service to industry and valuable saving of foreign exchange. Escorts, K.C.P., B.E.M.L., Ashok Leyland, Best & Crompton are a few among our customers numbering over 50, who have benefited from our specialised service.

MAHARASHTRA ELECTRONICS CORPORATION LTD.

INCORPORATED in 1978. **Directors :** Harish Mahindra (*Chairman*), N. Jayaraman (*Managing Director*), M. M. Wagle, P. K. Patwardhan and B. N. Bhagwat. **Secretary-cum-Financial Controller :** G. B. Kulkarni. **Registered Office :** Plot No. 214, Backbay Reclamation, Raheja Centre-13th Floor, Nariman Point, Bombay-400 021. Telephone : 240538. **Auditors :** Messrs. V. J. Choksey & Co.

Objects and Activities : The corporation promoted its first project viz. Meltron Semiconductors Ltd. for the manufacture of semiconductor power devices in collaboration with Thomson-CSF of France. The factory at Nasik has started commercial production in 1980. Government of India has nominated the Corporation as the second source for production of sophisticated items like ultraportable tape recorders, console tape recorders and heavy duty playback decks for the use by All India Radio and Doordarshan. The corporation has started an Audio Visual division in Bombay.

The corporation signed a collaboration with M/s. Kudelski of Switzerland for manufacture of ultra portable tape recorders. Also has a collaboration agreement with M/s. Studer of Switzerland for the manufacture of console tape recorders, portable tape recorders, heavy duty playback decks etc. and the audio visual division commenced production in 1980.

Letter of intent has been received to manufacture VHF communication equipments and microprocess based systems.

Messrs. Meltron Semiconductors Ltd. is a subsidiary company.

CAPITAL : Authorised : Rs. 5,00,00,000 in 5,00,000 Equity shares of Rs. 100 each. **Issued and Subscribed :** Rs. 3,88,60,000 in 3,88,600 Equity shares of Rs. 100 each fully paid-up.

Date of Accounts : 31st March.

MAHARASHTRA SCOOTERS LTD.

INCORPORATED in 1975. **Directors :** Rahul Bajaj (*Chairman*), Mehas Pawar, J. C. Nivasarkar, S. C. Shitole, R. J. Mantri, D. S. Mehta, M. G. Patil, Shekhav Bajaj, Gen. G. G. Benoov (*Retd.*). **Secretary and Chief Accountant :** J. Sridhar. **Registered Office :** C/o. Bajaj Auto Std., Bombay-Pune Road, Akurdi, Pune-411 035. Telephones : 83396, 82851. Telegrams : ' MAHASCOOT '. **Auditors :** Messrs. P. C. Parmar & Co.

Objects and Activities : Manufacture of scooters and other automotive or motorised vehicles, spares & components thereof. Scooters are produced under the brand name ' Priya '. The works are situated at MIDC area, Satara, Maharashtra.

Licensed/Installed Capacity : Scooters—52,000 Nos. p.a. The Company has agreements with Bajaj Auto Ltd., for outstanding technical know-how for the manufacture of scooters.

CAPITAL : Authorised : Rs. 2,00,00,000 in 15,00,000 Equity shares of Rs. 10 each and 50,000 Redeemable Cumulative Preference shares of Rs. 100 each. **Issued, Subscribed and Paid-up :** Rs. 1,42,85,710 in 14,28,571 Equity shares of Rs. 10 each fully paid. (Of these, 4,28,571 shares were allotted as Bonus by capitalisation of Reserves).

Date of Accounts : 30th June. **Transfer, Sub-division and Consolidation Fee :** *Nil.*

Dividend : 1984—25 per cent ; 1983—15 per cent.

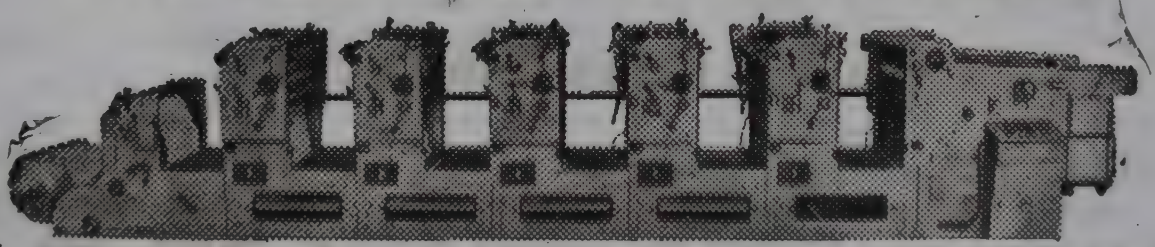
RO 62 Web-fed Offset Machine



Manufactured in technical collaboration with VEB POLYGRAPH, GDR.
Unbeatable in .... performance and price!

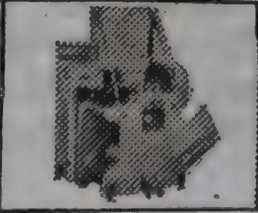
RO 62 has already made its impressive presence felt in leading presses in India and abroad. The fact that over 300 units of RO 62 have been exported so far, speaks for its international standards of performance.

RO 62 incorporates many innovative features which are the result of our continuous Research & Development—(the latest being the Rotary Numbering Unit).

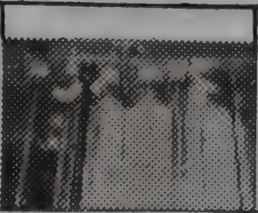
Technical Data
Printing Format 600 mm × 425 mm | Web width max. 620 mm
Printing Speed 15000 Sheets/hour | Web cut-off length (constant) 440 mm

Some of the PRINCIPAL UNITS developed by our R&D

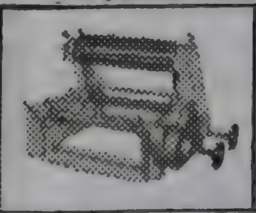
OPEN SHEET DELIVERY
Prevents smudging of fresh print



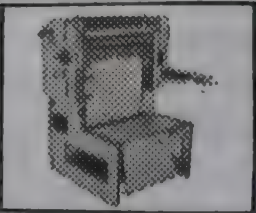
MOVABLE FOLDER
For production of signature from Web



QUICK PLATE CLAMPING CYLINDER
System ensures minimal plate preparation time, quick plate clamping on cylinder and perfect registration.



FRICTION REWINDER
Can be coupled to Sheeter



ROTARY NUMBERING UNIT
To print numbers on tickets, cheques, coupons, forms etc.

STATIONARY FOLDER
Highest folding accuracy with both second and third fold.

Manufactured by:
Maschinenfabrik

PHILIPS

From cassettes to sophisticated turntables and decks, Philips offers a complete range of audio equipment that combine to provide a wide choice in music systems.

When it's Philips, you're sure

If the name Philips has become synonymous with sound, there are good reasons for it. For years, Philips has been pursuing true sound. Designing equipment to meet exacting professional standards. Offering the consumer a wide range of equipment. And constantly updating them through ceaseless research.

When Philips produces a quartz control turntable or a two-in-one recorder, Philips meticulously checks every detail. Lays down stringent standards for every component that goes in. And performs exacting quality control tests to ensure that the final product is of the highest order.

So, be it turntable or two-in-one. Lamp or radio. Amplifier or battery. Before Philips puts its name on it, Philips makes sure. So, when you see the name Philips, you can be sure.

Philips—the trusted Indian household name for over fifty years

OBM/3149 R

PERMANENT MAGNETS LTD.

ESTABLISHED in 1969. **Directors :** Madanmohan R. Ruia (*Chairman*), Shreeram Taparia (*Managing Director*), Shyam Sunder Taparia (*Executive Director*), Dr. Antonio Sevesi, Dr. Cesare Rossi, Verawdan Taparia, G. N. Somani, J. P Taparia and R. C. S & S BUSHINGS LTD.

ESTABLISHED in 1965. **Directors:** V. Srinivasan (*Chairman*), N. Sankar, R. Subramanian, Air Masshal S. J. Dastur (*KSFC Nominee*), C. S. Vidyasankar. **Secretary:** S. Narayan. **Registered Office:** Dhun Building, 827 Anna Salai, Madras-600 002. Telegrams : 'MICABUSH'. Telephone : 89131. **Works:** Settigere Village, Bangalore. **Auditors :** Messrs. P. Srinivasan & Co.

Objects and Activities : Manufacture of high voltage condensor bushings, Arc Chamber for high voltage circuit breakers and other types of electrical equipment.

Licensed and Installed capacity (condenser bushings) : 1,300 nos.

Further diversification proposals to broaden the product base are being investigated.

CAPITAL : Authorised : Rs. 1,50,00,000 in 13,50,000 Equity shares of Rs. 10 each and 15,000 —11 per cent Redeemable Preference shares of Rs. 100 each. **Issued, Subscribed and Paid-up :** Rs. 90,00,000 in 9,00,000 Equity shares of Rs. 10 each.

Date of Accounts : 31st December. **Transfer, Sub-division** or **Consolidation Fee :** *Nil.*

Dividends: 1983—15 per cent, 1982—15 per cent, 1981—18 per cent, 1980—18 per cent.

S & S POWER SWITCHGEAR LTD.

Established in 1975. *Directors :* V. Srinivasan (*Chairman*), A. R. Rajagopalan, C. S. Vidyasankar, J. R. W. Hampson, A. R. Santhanakrishnan (*Managing Director*), A. C. Muthanna, A. L. Wolfendale, C. P. Jones, O. S. Murthy. **Secretary:** V. S. Narayanan. **Registered Offiice :** Porur, Madras-603 104. Telephones : 431078, 433664/5/6. Telegrams : 'CURRENTFLOW'. **Auditors :** Messrs. R. Subramanian & Co.

Objects and Activities : Manufacture of medium voltage HRC fuselinks, pantagraph and switching isolators for EHV system (66-400 KV), HRD fuses of 11 KW and above, and vacuum switchgear and H. T. upto 33 KV. Proposals for the manufacture of certain types of circuit breakers and auto reclosers are under consideration.

CAPITAL : Authorised : Rs. 1,00,00,000 in 10,00,000 Equity shares of Rs. 10/-each. *Subscribed :* Rs. 80,00,000 in 8,00,000 Equity shares of Rs, 10/-each.

Date of Accounts ; 31st December, Transfer, Sub-division or Consolidation **fee ;** *Nil.*

Dividends ; 1983—15 per cent ; 1982 Nil; 1981-Nil.

S. S. MIRANDA LTD.

INCORPORATED in 1975. **Directors :** Ajay G. Piramal (*Chairman and Managing Director*), Nirmal R. Ruia, Hemandra M. Kothari and R. K. Agrawal. **Secretary :** Mahesh K. Mehta. **Registered Office :** Ashok Road, Kandivli (East), Bombay-400 101. Telephone : 694308/09. Telegrams : 'MAYFLY'. **Auditors :** Messrs. Haribhakti & Co. Bombay.

Objects and Activities : Manufacture of tool bits, hacksaws, metal cutting bandsaws, woodworking bandsaws and wetsaws. The company is also engaged in the trading of liquors and investment business. The company has acquired 10 acres of land at Jalagaon, a notified backward area, to set up a plant for the manufacture of hacksaws of both high speed steel and low alloy bandsaws and custom made tool bits.

CAPITAL : Authorised : Rs. 80,00,000 consisting of 8,00,000 Equity shares of Rs. 10 each. **Issued, Subscribed and Paid-up :** Rs. 80,00,000 in 8,00,000 Equity shares of Rs. 10 each fully paid up. (Of the above 4,00,000 shares are allotted as fully paid-up by way of bonus by capitalisation of reserves).

Date of Accounts : 31st December.

SAE (INDIA) LTD.

INCORPORATED in 1951. **Directors :** A. Colombo, Dr. Pellicano, D. D. Nath, P. P. Ginwala, R. V. Naidu, Dr. C. Rossi, J. M. Mukhi and Gino Pace. **Executive Director :** N. S. Mittal. **Secretary :** G. B. Prabhu. **Registered Office :** 29 and 30, Community Commercial Centre, Besant Lok, Vasant Vihar, New Delhi-110 057. **Auditors :** Messrs. S. S. Kothari & Co.

Objects and Activities : Manufacture of transmission line tower components and part s, construction of power transmission lines and electrification of Railways.

CAPITAL : Authorised : Rs. 2,00,00,000 in 10,00,000 Equity shares of Rs. 10 each and 10,00,000 Unclassified shares of Rs. 10 each. **Issued, Subscribed and Paid-up :** Rs. 75,00,000 in 7,50,000 Equity shares of Rs. 10 each fully paid. (Of the above 2,50,000 Equity shares are allotted as fully paid-up by way of Bonus shares by capitalisation of General Reserve).

Date of Accounts : 30th June.

SLM-MANEKLAL INDUSTRIES LTD.

INCORPORATED in 1961. **Directors :** Jaykrishna Harivallabhdas (*Chairman*), Rasesh N. Mafatlal, Kaspar Vogel (*Special Director*), Russi Jal Taraporevala, Yogesh T. Maneklal (*Managing Director*), Dilip A. Shah (*Whole-time Director*), Bhavarsinghji M. Bhandari, Mansingh L. Bhakta, Rameshwar C. Malhotra, A. C. Sheth (ICICI *Nominee*) R. D. Shah (*Nominee Director*—GIIC). **Secretary :** K. K. Narayan. **Registered Office :** Shafi Manzil, Ashram Road, Ahmedabad-380 009. Telex: 414. Telegrams : 'SWISSDISEL'. Telephones : 448028, 448121, 448977. **Head Office :** Vaswani Mansions, Dinshaw Vachha Road, Post Box No. 11066, Bombay-400 020. Telex: 2513.

Telegram : 'SWISSDISEL'. Telephone : 221114. **Auditors :** Messrs. Naushir M. Marfatia & Co. and Messrs. C. C. Chokshi & Co.

Objects and Activities : The company manufactures rotary air compressors, vacuum pumps, exhausters, twinlobe compressors of SLM design in collaboration with M/s. Swiss Locomotive Machine Works, Switzerland. It has technical collaboration arrangements with Kautex Werke Remhold Hagen GmbH, West Germany, for manufacturing plastic blow-moulding machines ; with Standard Alkali, Bombay for chlorine compressor; with BBC Oerlikon, Badan, Switzerland for exhausters and compressors ; with Sulzer Brothers Ltd., Switzerland for GR (special type) blowers ; with Pinette Emidecau for hydraulic presses and with Toshiba Machine Co. Ltd., Japan, for plastic injection moulding machines. It also operates foundry for C. I. castings and S. G. Iron castings. The company also manufactures industrial vacuum cleaners ; pumps for shipping industry in collaboration with Hamsworthy of UK, rubber cots and aprons in collaboration with Otto Kuhen GmbH of Austria.

T. Mankelal Division manufactures textile processing machinery such as rotary screen printing machines, sectional warper, soapers, slenters, mercerisers, jiggers, continuous bleach plant and continuous dyeing plant, besides industrial rubber coated fabrics, expansion joints, pneumatic mangles, shrinking range, rubber blankets, rubber machinery extruders, stock blenders, pneumatic conveying systems, etc. It has collaboration arrangements with Buser, Benninger, Walter Osthoff of West Germany and L. Dumont of France and Tecalemit Flexibles of France. There are proposals to take up manufacture of spiral wound wire branded hoses in collaboration with Uniroyal Manuli.

CAPITAL : Authorised : Rs. 5,00,00,000 in 4,80,000 Equity shares of Rs. 100 each and 20,000 Preference shares of Rs. 100 each. **Issued and Subscribed :** Rs. 2,99,52,000 in 2,99,520 Equity shares of Rs. 100 each fully paid.

Date of Accounts : 31st March.

Dividend declared : 1982—14 per cent, 1981—14 per cent, 1980—17 per cent.

The company has participated in the equity capital of P. T. Standard Mills Industrial, indonesia. Epuipment Hoses Ltd., is a wholly-owned subsidiary of the company. Benninger Manekeal Engineering Ltd., is a subsidiary of the company.

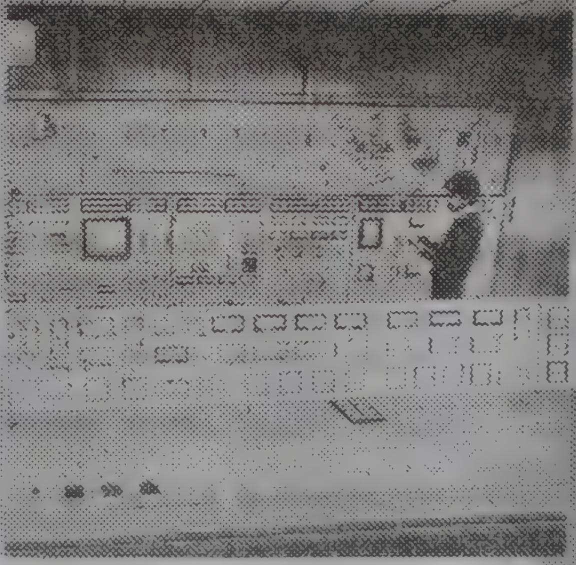
SIEMENS

Setting the trend in Control and Automation Systems

Siemens are tuned to the requirements of Indian industry, setting the trend by providing versatile automation systems for complex industrial process operations. The systems provide maximum plant availability, economic production and safety of operation.

Some of our clients for these systems include Satna Cements, Ramagundam Thermal Power Station, West Bengal Electricity Board, Atul Products, BHEL, Modipon Ltd. etc.

These systems, using modern technology from Siemens A.G., are indigenously manufactured and tested to stringent quality standards. Installation and commissioning, as well as after sales service is done by a team of expert engineers and technicians



Control room in cement plant.

Indian Organic Chemicals Limited

LEADERS IN THE FIELD OF INDUSTRIAL CHEMICALS

Our Range of products :

ACID GROUP

- Acetic Acid
- Acetic Anhydride
- Acetaldehyde

BENZYL PRODUCTS

- Benzyl Acetate
- Benzyl Alcohol
- Benzyl Chloride
- Benzaldehyde

ESTER SOLVENTS

- Ethyl Acetate

PLASTICIZERS

- DOP (Di Octyl Phthalate)
- DBP (Di Butyl Phthalate)
- DEP (Di Ethyl Phthalate)
- DIOP (Di Iso Octyl Phthalate)
- BBP (Benzyl Butyl Phthalate)
- Futura Polyester Staple Fibre

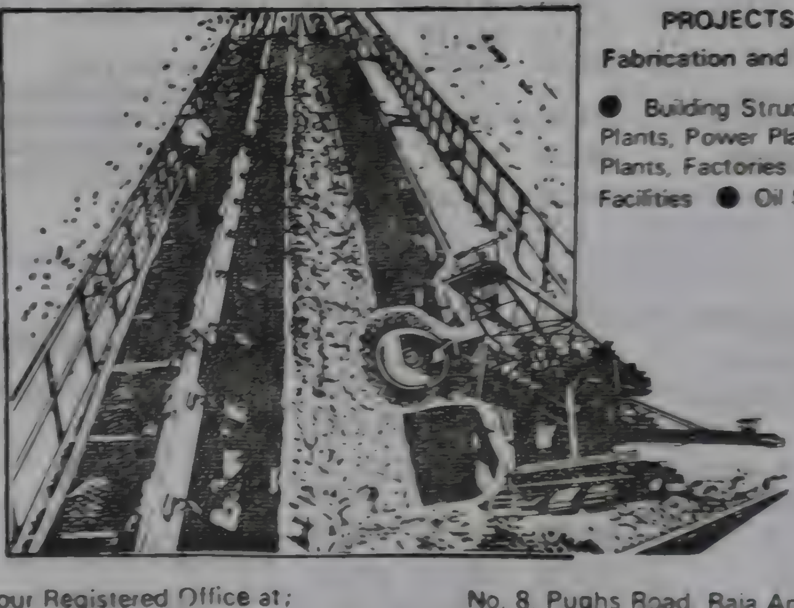
SOUTHERN STRUCTURALS LIMITED
(A Tamil Nadu Government Co)

Pioneer in Heavy Structural Fabrication.

WORKS DIVISION

Manufacturers of :

● E.O.T. & Gantry Cranes upto 200 T Capacity ● Hydraulic Gates and Hoists ● Pressure Vessels ● Special Wagons ● Mining Equipment Such As Bucket Wheel Excavators, Mobile Transfer Conveyors, Conveyors etc. ● Technological structures And other Miscellaneous Fabrications.



PROJECTS DIVISION

Fabrication and Erection of :

● Building Structures For Steel Plants, Power Plants, Sugar Plants, Factories etc. ● Port Facilities ● Oil Storage Tanks.

Total reliability

TVS fasteners from Sundram Fasteners

The 'TVS' name assures total reliability in quality high tensile bolts, screws and nuts.

Precision engineered, cold forged and heat treated, these fasteners are manufactured to meet a variety of applications. From buses to motorcyles. From industrial engines to earth moving equipment. Also used in other non-automotive engineering applications.

Sundram Fasteners use cold extrusion to give a 60% material saving. This advanced technology replaces conventional metal removal by metal forming.

Another factor to contribute to considerable material economy and precision of intricate components is the usage of powder metallurgy.

TISCON

The singleminded concentration of 400 men is helping to keep the Thana Creek Bridge from cracking up.

And the Jamuna Bridge, Delhi, the Ganga Bridge, Patna... in fact, all major bridges built in the last decade.

Because TISCON, from Tata Steel, is the superior ribbed reinforcing bar that more and more architects and engineers, from all over India, are specifying.

The reason? Its quality.

At Tata Steel, quality is carefully built into TISCON at every stage of its production. 400 highly skilled, trained and dedicated experts carefully monitor every aspect of TISCON production. From the raw material to the finished bar, at every stage during the production process, the slightest deviation from the established practices and specifications means rejection. No matter what the production loss entailed. The result of this singleminded concentration on quality? A superior ribbed reinforcing bar with consistent properties.

For more information on TISCON bars, write to us at any of our sales offices. We'll send you the details or have someone call on you.

TISCON
The superior ribbed reinforcing bar

THE WISE CHOICE OF DISCERNING BUYERS

Range of Manufacturing items :

i. **TEXTILE MACHINERY**
- High Speed Ring Spinning Frames
- High Speed Winders
- Type RT-Cone Winders
- Type DRT-Doubler Winders
- Hank to Cone Winders
- Heavy Duty Doublers
- Worsted Ring Frames
- Cots Grinders
- Woollen/Shoddy Ring Frames

ii. **MACHINE TOOLS**
- Bar Turning Machines
- Cylindrical Grinding Machines
- Centreless Grinders
- Gear Hobbers

We also undertake the manufacture of special purpose Machine Tools for Engineering Industry.

iii. **ALLOY STEEL CASTINGS & FORGINGS**

Forgings :
- High Speed Steel
- Heat Resistant Steel
- Die Steel
- Ni-Cr-Mo Steel
- Tungsten Steel

Castings :
- Hadfield Manganese Steel
- Plain Carbon Steel
- Low and High Alloy Steel
- High Carbon Steels
- High Chromium Steel
- Heat Resistant Steel
- Stainless Steel

iv. **IRON CASTINGS**
- S. G. Iron
- Graded Cast Iron

VISVESVARAYA IRON & STEEL LTD.

(A Public sector undertaking)

INCORPORATED in 1961 **Directors :** T. R. atish Chandran, I.A.S. (*Chairman*), S. K. Hajra A.S. (*Vice-Chairman* and *Managing Director*). **ominees of the Government of Karnataka :** . P. Surendranath, I.A.S., J. C. Lynn, I.A.S., B. G. udrappa, Silera S. Siddappa. **Nominees of the teel Authority of India Limited:** V. Ramanujachar, A.S., A. A. Raju, M. C. De Tarafdar, **Nominee f the Financial Institution :** Dr. M. L. Shirkant ecretary : V. Krishnan. **Registered Office :** hadravati-577 301. Karnataka. Telephone : 322. elex : BG 0845-366. Telegram : 'MYSIRON'. **uditors :** Messrs. K. P. Rao & Company.

Objects and Activities : Production and maret ing of alloy and special steels, including sophisticated alloy steels like high speed steel, die blocks, die steel, tool steel etc., in addition to ferro alloys and ferro vanadium from vanadiferrous ore; C. I. castings; cast iron spun pipes; mild steels and structures and cement.

CAPITAL ; Authorised : Rs. 75,00,00,000 in 75,00,000 Equity shares of Rs. 100 each. **Issued and Subscribed :** Rs. 46,40,00,000 in 46,40,000 Equity shares of Rs. 100 each. (Of the above, 27,84,000 Equity shares are held by the Government of Karnataka, and 18,56,000 shares are held by the Steel Authority of India Limited.

Date of Accounts : 31st March.

VULCAN-LAVAL LTD.

INCORPORATED in 1937 under the name of Vulcan Trading Company Limited, subsequently changed to the present name 'Vulcan-Laval Limited' in 1965. **Directors :** Kamaljit Singh (*Chairman*), V. Iswaran, Lars H. Haliden, A. Sundberg, Lars H. Trane, Henrik Hegardt, F.A.A. Jasdanwalla, J. N. Guzder, V. A. Datar (*Managing Director*) **Secretary :** T. V. Ramachandran. **Factory :** Bombay-Pune Road, Dapodi, Pune-411 012. **Registered Office :** Mustafa Building, 7A, Sir Pherozeshah Mehta Road, Bombay-400 001. Telephones : 257444, 257362 and 257369. Telegrams : 'NORDIC'. **Auditors :** M/s. Price Waterhouse & Co.

Objects and Activities : The company manufactures a wide range of dairy and food processing equipment, plate heat exchanges and industrial separators in technical collaboration with M/s Alfa Laval, AB, Sweden, pioneers in the field of dairy, food processing and other industrial machinery. The company is also in technical collaboration with M/s. Anhydro AS, Denmark for the manufacture of spray dryers, evaporators etc. The company has also concluded a technical collaboration agreement with M/s. Titanium Fabricators Limited, Sheffield, U.K. for manufacture of plant and machinery from metals like Titanium, Tantalum, Zirconium, Niobium, Nickel and Nickel alloys. Among the other items of machinery manufactured by the Company are leather tanning and finishing machinery, foundry and shot blasting machines with technical assistance from M/s. BMD Badische Maschinenfabrik Durlach GmbH of West Germany.

CAPITAL : Authorised : Rs. 4,00,00,000 divided into 30,00,000 Equity shares of Rs. 10 each and 10,00,000 Unclassified shares of Rs. 10 each. **Issued and Subscribed :** Rs. 2,31,75,000 in 23,17,500 Equity shares of Rs. 10 each. [(*a*) 4,41,845 $\frac{9}{10}$ shares have been allotted as fully paid-up pursuant to contract without payment having been received in cash. (*b*) 29,988 shares have been allotted as fully paid-up pursuant to the right exercised by Industrial Credit and Investment Corporation of India Limited of converting a part of the loan advanced by them to the company. (*c*) 5,66,896 Equity shares have been allotted as fully paid-up by way of Bonus shares by capitalisation of General Reserve]

Date of Accounts : 31st December. **Transfer Fee :** *Nil.* **New Certificate Fee :** *Nil.*

What's VULCAN-LAVAL got to do with all of them?

A lot. Because they're all areas that Vulcan-Laval has extended its expertise to. And to others as well ... Vegetable Oil, Petrochemicals, Marine and Pharmaceuticals. A variety of fields where Vulcan-Laval is making its mark today.

Behind this expertise lies the most advanced technology from Alfa-Laval, Sweden, Anhydro, Denmark and Titanium Fabricators Ltd., U.K. Because Vulcan-Laval believes in keeping in constant touch with the latest know-how.

Behind this expertise lies every modern manufacturing facility required to adapt and develop know-how to every need. And skilled manpower greatly contributes to Vulcan-Laval's wide ranging product and project capability.

The result? A company that has gone from strength to strength. Flow equipment. Chemical equipment fabrication. Oil separation techniques. Heat transfer systems. Food processing systems. Refrigeration engineering. Process lines. Multi-product capability. A company that's doing so much for the needs of so many industries at the same time.

That's Vulcan-Laval for you. There's no end to the areas where its expertise is put to good use. An all-round performance from all-round engineering specialists.

Dividends : 1982—30 per cent, 1981—25 per cent, 1980—25 per cent.

ZENITH STEEL PIPES & INDUSTRIES LTD.

(Formerly Zenith Steel Pipes Ltd.)

ESTABLISHED in 1960. **Directors :** Ashok Birla (*Chairman*), Bansi S. Mehta, Jagdish K. Munshi, M. P. Gandhi, Rahulkumar Bajaj, A. D. Dahanukar, B. V Bhargava (*Nominee* of ICICI), M. R. Dasgupta (*Nominee* of GIC), M. L. Bhakta, Dilip G. Piramal. **Secretary :** J. P. Khemka. **Registered Office :** Moti Mahal, 195, Churchgate Reclamation, Bombay-400 020. Telephone : 221122. Telex : 011-2458/6334. Telegrams : 'ZEENPIPES'. **Auditors :** Messrs. Dalal & Shah ; S. R. Batlioboi & Co.

Objects and Activities : The company is divided into several operating units viz. Pipe Division, Rolls & Shears and Chemical Division, Special Steels and Rolling Mill Division, Paper Division, Tool Divison and Textile Division. Products manufactured include steel pipes and tubes of all descriptions—welded and galvanised pipes and fittings, steel ingots and billets, industrial tools and knives, re-rolled products, H. Acid, J. Acid etc., paper and paper boards, micrometers carbide tipped tools, gear hobs, gear shaper cutters and man-made fibre yarn. The works are situated at Banah in Punjab, Khopoli, Boisar, Sion (Bombay), Aurangabad, Nasik and Khamgaon in Maharashtra,

IOL
Industrial Gases • Welding Products
Cryogenic Plants • Health Care Products

When people in highly diverse fields look for "the IOL mark", what do you think it implies?

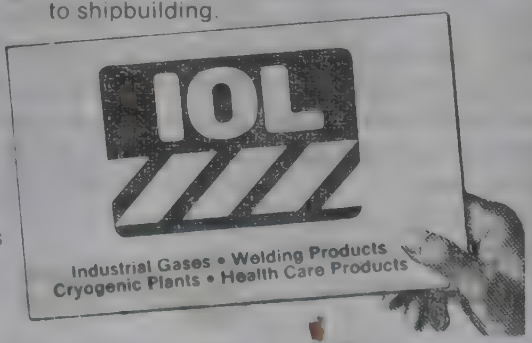
Simply that Indian Oxygen Limited (IOL) has acquired an enviable reputation for the quality of its products and service. In areas far beyond only oxygen.

Industrial gases : applications to spur development in vital industries

IOL pioneered the manufacture of oxygen, nitrogen, argon and dissolved acetylene in India. Today IOL's gases have varied applications. From wayside welding to shipbuilding to INSAT, from transportation and telecommunication to power and mining. The Company not only manufactures these gases but is unique in providing technologies associated with their different applications. Further, IOL manufactures special gases which play a vital role in sophisticated industries and research.

A new dimension to metal fabrication.

IOL offers a comprehensive range of welding equipment, consumables and accessories for customers. All this, along with advisory services, comprises a total welding "package". IOL also offers cutting machines to suit every industry. From automobile manufacture to shipbuilding.



IOL
Industrial Gases • Welding Products
Cryogenic Plants • Health Care Products

Cryogenic technology for building infrastructure

IOL's cryogenic plant and associated equipment manufacturing activity has helped build the infrastructure for planned development. The Company offers complete cryogenic plants, and engineering, distribution and handling systems on a turnkey basis. IOL was the first to manufacture and supply air separation units in India.

Health care : a priority concern

The Company continues to contribute to the medical profession with an assured supply of medical gases, anaesthetic equipment and equipment for lung functions. As well as centralised distribution systems through pipelines for medical gases and vacuum to medical establishments.

Your assurance of quality and service

CROMPTON GREAVES– WHERE POWER IS.

For nearly three-quarters of a century, Crompton Greaves products have been propagating the power of electricity. To customers all over India and in 70 countries. From giant projects to the smallest factory. From sprawling fields to hospitals, hotels and homes. Wherever the power of electricity is generated, tamed and harnessed.

Our expertise and competence mean an extensive line of world class products and services. Our well-coordinated, precise manufacturing and testing facilities—the finest in the country—as well as our result-oriented Research & Development make for a high degree of technological excellence. Our vast experience gives us the capability to undertake project engineering and turnkey electrification assignments—regardless of their size. Above all, because Crompton Greaves is Crompton Greaves!

From power to productivity to progress.

JUTE INDUSTRY

THE Indian Jute Industry, one of the oldest and the largest foreign exchange earner for the country, is passing through a crisis which is so grave that, unless appropriate steps are taken to solve the problems of the industry, many mills would have to close for ever. Jute is one of the largest pillars on which rests the edifice of West Bengal's economy and, its collapse would bring down the entire structure. The after-effects of the disaster would not be limited to West Bengal alone but also the whole economy. Most of the mills are in the red with massive erosion of cash resources. Rising costs, depressed prices, labour force averse to modernisation, severe competition from Bangladesh and the U.S. synthetics, production cuts, antiquated technology etc., have all contributed to the present net negative worth of the industry.

Over the past thirty-five years or so, the jute industry in India has gone through various vicissitudes in respect of production, consumption and exports. Since the partition of the country in 1947, the industry is facing a veritable crisis due to acute shortage of raw jute. Against a minimum raw jute requirement of 8.5 million bales per year, the country has produced 6.3 million bales to 7.4 million bales during the past three years namely 1980-81, 1981-82 and 1982-83.

With a carryover of 8 lakh bales at the beginning of the current jute season and an estimated output of 7.2 million bales, the availability of raw jute is expected to reach a level of only 8 million bales. Allowing for half a million bales for rural consumption and contractual exports and a normal carryover of one million bales, only 6.5 million bales will be available for consumption by the mills, which will be insufficient to produce 1.4 million tonnes of jute goods. The long term solution to the fibre problem lies in improving the yield thereby ensuring a better return to the grower or, the alternative course to the increasing requirements of raw jute would be, to import the fibre in order to bridge the gap, or still further curtail production in line with fibre availability which would cause a shortage of jute goods in the market.

The total production of jute goods during 1982-83 was 1.34 million tonnes as against 1.39 million tonnes and 1.33 million tonnes in 1980-81 and 1981-82 respectively. Of the total production of 1.34 million tonnes in 1982, the share of sacking constituted 59 per cent, hessian 24 per cent, carpet backing, 4 per cent and others 13 per cent. At present, Jute area is established at around 0.8 million hectares and Mesta about 0.35 million hectares. Jute and Mesta provide sustenance to 4 million farm families while the mills employ 0.25 million people. The national average of fibre yield is low at 14 quintals per hectare but with adoption of improved methods, it could be raised to about 20 quintals per hectare. The problems of jute and mesta cultivation are mainly associated with lack of resources, and non-adoption of improved methods of cultivation. Potentialities to increase the productivity exist, but to realise these, well coordinated efforts of research and development are necessary.

TABLE 1

The domestic market for jute goods in India is undoubtedly growing much faster than the export market. As a matter of fact, export is declining so far as jute products from India are concerned. An industry that was mainly export-based, now markets over 70 per cent of its products in the internal market and it is possible that this proportion will keep rising, making India in due course a residual exporter. No doubt, the fast growing domestic market must be capitalised, but at the same time the export market must not be ignored. A fall in the volume of exports causes worry because it leads to a fall in foreign exchange earnings which India badly needs. What has been observed in the past few years is that every increase in the domestic market has been accompanied by a decline in exports. This has led to a situation where the total output of the jute industry has remained virtually static. The industry has therefore been unable to reduce its costs as (i) it has been unable to expand and (ii) whereas individual mills have been trying to increase production, there has been no concerted effort to raise the total output of the industry. In order to ensure that the objective of a higher total output is met, no decline in the export market must be permitted, and at the same time, care must be taken to reap the full advantage of the growth in the domestic market.

The export picture of the jute industry is not remarkable either. What is disheartening to note is that, India which was once known to be the prime supplier of jute goods to the world markets is now termed as a residual seller in the international market. The reasons for declining exports are by now well known. It is mainly the competition from Bangladesh and synthetics, especially from the United States which has done most damage. Following the devaluation of the rupee in 1966, export duties were imposed on jute manufactures including carpet-backing. These export duties provided the umbrella under which the synthetics industry grew in the mid-60's and was one of the main factors responsible for rendering Indian jute goods uncompetitive.

At one stage, Indian carpet-backing had a substantial market in the U.S. tufted carpet industry, but over the years it has completely lost the market for primary backing and only the secondary backing market now remains, which is shared between Bangladesh and India. The demand for jute goods as for carpet backing is a function of housing activity in the United States, which again is subject to serious fluctuations depending on the state of that country's economy. This explains why the U.S. demand for carpet-backing has fallen so low in recent months, creating crisis conditions in the jute industry.

The industry's demand problem has been compounded by the Soviet Union virtually keeping out of the Indian hessian market for the past several months. Looms can be interchanged between various products but the scope now is rather limited as the industry is already facing a demand problem for sacking also. Bangladesh, which started with a small export volume has now captured more than 50 per cent of the world's jute market. Its export volume has overtaken India's by several lengths. The ample supply of high quality fibre coupled with the advantage of modern technology and adequate backing of the Government in the field of export promotion has gone a long way to help Bangladesh establish a strong foothold in the overseas market. China is also beginning to offer serious competition. One of the reasons for this is that prices in that country have little bearing on the actual costs of production. Once the Government decides to market a product abroad they go all out to quote prices which are below the prices prevailing in the international market.

The jute industry has been passing through a major crisis especially during the last three years in the form of rising costs on the one side and falling sale price on the other. Most of the units are at the brink of bankruptcy. Even inspite of widespread defaults in statutory dues, the units in the industry have been struggling to find the money to keep them running. It is therefore essential to seek methods that would ensure a reduction in costs, and a fair price to the cultivator. The present problem is mainly due to this movement of the cost structure and the price structure in different directions, which has completely eroded the financial base of the industry.

The price of jute goods in the internal market have in real terms been declining. This is because traditionally export prices have determined internal prices and, today intense competition is being offered by Bangladesh and also China. Another factor contributing to the higher costs is the antiquated condition of most of the machinery installed in Indian Jute Mills. The last major modernisation in the jute industry was carried out in 1955-60. In the late 60's and early 70's some modernisation was effected in a few jute mills. The reason for the slow pace of modernisation is, the fear of unemployment and the involvement of heavy capital outlays.

According to a recent study conducted by the Reserve Bank of India, raw jute and labour costs accounted for as much as 82 per cent of the total costs of the jute industry. Because of the unprecedented power crises in West Bengal, the jute industry had to go in for captive power generation to the extent of 90 per cent of its requirements. Apart from the capital cost involved, which is very considerable, the cost of power generated from these sets is four to five times the cost of power from the State grid. Besides these, there are other costs such as high rate of indirect taxes and duties levied on various inputs by the Central as well as the State Governments, which have increased the financial burden of the jute industry.

Hence, the future of the jute industry depends on the ability to take steps to counter rising costs and maintain or reduce the cost of unit product by modernisation and technological development.

The question of jute products pricing is of crucial importance. The jute industry has proposed a dual pricing system which in essence, comprises the fixation of prices by the Government, and the administration of the prices through controlled releases. A quota would be given to each mill beyond which it cannot sell in the domestic market. There would be no restriction on production, for the mills could sell in the export market as much as the buyer is prepared to take.

The sales in the domestic market would be so regulated as to keep the prices at the levels fixed. The price fixed would include cost plus return plus compensation for losses on exports. Whenever the prices fell below the fixed level, the quotas would be raised and likewise when the prices rose above that level, the quotas would be reduced. Such alterations would keep the prices stable. The dual pricing scheme is intended primarily to raise resources for export from the domestic market.

The vital importance of jute in the economy of India does not need any special emphasis. It would perhaps be sufficient to point out that even under extremely adverse conditions, jute products are earning foreign exchange to the extent of Rs. 200 crores annually. The health and viability of the jute industry and trade is, therefore, a matter of deep concern. The present crisis in the jute industry can be resolved and that, despite an attractive domestic market, it is still possible for Indian jute to hold its place in the international market, provided an integrated policy is evolved.

Any policy for revival of jute goods export must recognise the fact that the damage done by levying export duties will have to be undone by substantial export incentives for many years to come till viability is restored to the industry and it could actually be able to sell at international prices. Till such time, Indian products will have to be offered cheap, sometimes even at below cost prices, in the overseas markets. A policy which would involve the participation of all the links in the export market chain must be formulated. This would include encouragement of the 'Merchant exporters' as the established channel for promoting export business. The facility in the form of cash compensatory support which is an export incentive should be extended to merchant exporters also in order to boost exports.

The most important factor in any marketing strategy is price stability. It is only through price stability and clear-cut guidelines from Government regarding the conduct of jute export business that exporters would be able to get a firm foothold into the declining markets. Adhocism that currently prevails in most of the policies governing the industry has to be avoided if exporters are required to make fresh inroads into the erstwhile booming markets. The competition that is faced from synthetics is indeed very strong but with the assistance of intensive marketing policies and strategies, India would be able to offer a stiff challenge.

Another area which needs attention, is diversification. It is the core survival of any business and today this maxim applies as strong as ever for the jute industry. Diversification has assumed importance, both because of the competition that the industry is facing from other exporting countries as well as the development of substitutes. India has very strong competitors in Bangladesh and China who will go to considerable lengths to procure business because of the inherent production and selling advantages that they enjoy. It therefore becomes necessary for India to diversify into other lines of jute goods business and conduct extensive research for the development of lighter and sophisticated value added products, which besides being price competitive would be quality competitive. The industry as well as the Government must provide adequate funds for research in the field and from time to time must organis international exhibitions and fairs for marketin of newly developed products. With new produc development, exporters would find it easier t increase their business with the traditional as we as non-traditional markets.

The situation in jute industry today is a hopeles one. It is of paramount importance that th reasons underlying the present crisis be we diagonised to enable the industry regain its pos tion as a premier supplier of products made fro the golden fibre, to the world.

THE AGARPARA CO. LTD.

ESTABLISHED in 1927. **Directors :** K. P. Goenka (*Chairman*), H. V. Goenka, M. Sen Sarma, K. K. Bajoria, K. Tapuriah, G. K. Kanoria, and L. M. Roy (*Nominee* of I.F.C.I.). **Secretary :** R. Venkatachalam. **Registered Office :** 'Tobacco House', 1 & 2 Old Court House Corner, Calcutta-700 001. Telegrams : 'VALUABLE'. Telephones : 22-6823 (10 lines). Telex : 373. **Auditors :** Messrs. Lovelock & Lewes.

Objects and Activities : Manufactures jute goods. The mill driven by electricity is situated at Kamarhatty about nine miles north of Calcutta. The Agarpara Investments Ltd., is a subsidiary of the company.

CAPITAL : Authorised : Rs. 70,00,000 in 6,00,000 Ordinary shares of Rs. 10 each and 10,000 7 per cent Cumulative Preference shares of Rs. 100 each. **Issued and Subscribed :** Rs. 70,00,000 in 1,50,000 Ordinary shares of Rs. 10 each fully paid in cash, 4,50,000 Ordinary shares of Rs. 10 each issued as fully paid for consideration other than cash, and 10,000—7 per cent Cumulative Preference shares of Rs. 100 each fully paid in cash (Of the above shares 4,50,000 Ordinary shares are allotted as fully paid-up Bonus shares by Capitalisation of Reserves, and 3,42,820 Ordinary shares are held by the holding company).

Date of Accounts : 31st March.

ANGLO-INDIA JUTE MILLS CO. LTD.

INCORPORATED in 1917 at CULCUTTA. **Directors :** J. P. Goenka (*Chairman*), J. M. Goenka, D. K. Basu, Sanjoy Sen, S. Singh Roy, P. M. Narielwala (IFCI *Nominee*), G. Sivaraman. **Secretary :** A. K. Sen. **Registered Office :** 31, Netaji Subhas Road, Calcutta-700 001. Telegrams : 'DUNCANS'. Telephone : 226831. Telex : 317. **Auditors :** Messrs. Price Waterhouse & Co.

Objects and Activities : Manufacture and sale of jute goods. The products manufactured are hessian, sacking and twine.

Capacity	*Licensed*	*Installed*
Jute Products (tonnes)	62,695	62,053

Directors : V. N. Bhagat, S. N. Dalmia and B. L. Rajgarhia. **Secretary :** B. K. Agarwalla. **Mills :** Shamnagar, 24, Parganas (West Bengal). **Registered Office :** 10, Clive Row, Calcutta-700 001. Telephone : 264958-9 ; Telegrams : 'HESINTWINE'. **Auditors :** Messrs. Ray & Ray.

Objects and Activities : Manufacture of jute, jute goods, hessian, sacking canvas, carpet and twine.

Licensed Capacity ; 150 Broad Looms and 350 Narrow Looms.

Installed Capacity ; 124 Broad Looms and 297 Narrow Looms.

CAPITAL : Authorised : Rs. 1,00,00,000 9,30,000 Equity shares of Rs. 10 each and 7,000—5.85 per cent Redeemable Cumulative Preference shares of Rs. 100 each. **Issued and Subscribed :** Rs. 55,00,000 in 4,80,000 Equity shares of Rs. 10 each fully paid-up and 7,000—5.85 per cent Redeemable Cumulative Preference shares of Rs. 100 each fully paid-up. Of the above, 25,000 Equity shares were issued as fully paid-up for consideration other than cash, and 3,50,000 Equity shares were allotted as fully paid-up Bonus shares by capitalisation of General Reserve.

Date of Accounts : 31st December.

KOTHARI *(Madras)* INTERNATIONAL LTD.

Can Open Doors For You

If you are looking for opportunities in India, deal with us—THE KOTHARI GROUP—and benefit from our sixty years of rich business experience. Let us open doors for a lucrative investment for you as we have done for thousands of others. You need a Company like ours with the stability and vision to correctly interpret the Indian business environment. We have qualified staff with the necessary experience to handle sophisticated transactions in a variety of fields. Here are some of our specialised areas of activity. Between us there could be more !

Cloth Exports :	**Grey sheetings and weft sateen.**
Yarn Exports :	**Counts from 12s to 100s both Carded and Combed in Hanks and Cones.**
Tea Exports :	**BOP and BOP Fannings.**
Chemicals Exports :	**Caustic Soda, Sulphuric Acid and Hydrochloric Acid.**

Kothari (Madras) International Ltd.

'KOTHARI BUILDINGS'

Telephone : 472131, 474369, 474866, 474901, *Telex* : 325
Trunk : 476036, 473311, 474001 *Grams* : 'KOTHARI'

OURS IS A HIGHLY PERSONALISED SERVICE, PLEASE !

Proudly, we are taking India back to the 12th century.

Time was when the world knew India as a great trading nation. Today, centuries later, India is all set to regain that position in the global market place.

And, bringing India into prominence amongst the world trading community are MMTC and STC.

The Minerals and Metals Trading Corporation of India Limited and The State Trading Corporation of India Limited. Premier organisations that serve as the two arms of India's foreign trade. Whose combined expertise has taken Indian goods to countries all around the globe. And whose formidable bulk-buying capability has brought a wide range of products for India's needs. At the right time, right price and in the right quantity. To serve the consumer as well as the core sectors of India's growing economy.

MMTC and STC. Trading in items as diverse as minerals and textiles, metals and sports goods, fertilisers and electronic items, diamonds and leatherware. And giving India the edge by integrating exports and imports and evolving new means for enhancement of trade.

While India braces itself to meet the challenges of the 21st century, MMTC and STC are devising ways and methods to stay ahead in global trade. By adopting strategies like Counter Trade and Third Country Trading; Joint Ventures and Source Development Activities. Exploring trading possibilities for a host of non-traditional items. And, opening up the global market for India's small and medium scale entrepreneurs, artisans and craftsmen.

MMTC and STC — emerging, stronger than ever before, as the synergistic force that gives India the best of both worlds in global trade.

MINERALS AND METALS

NATURAL resources of a country determine to a large extent, the course of its economic development. A developing nation while chalking out its path of development, has to draw up primarily a careful programming for the exploitation of locally available natural resources. India is endowed with rich and varied natural wealth and its potential for development is therefore very high. These potentialities can be fully realised only by a properly programmed exploitation and usage of non-renewable resources and maintenance of the quality of renewable resources. It is very important to take into account that mineral resources being exhaustible, their exploitation, harnessing and conservation should be most meticulously planned.

India's Mineral Resources

India's reserves in respect of coal and iron—the basic minerals which are economically vital—are ample. Besides these, manganese ore, mica, gold, ilmenite, bauxite and building materials are produced in significant quantities. However, in respect of a number of important minerals such as copper, tin, lead, zinc, nickel, graphite, cobalt, sulphur, mercury and petroleum, the country's domestic production is well short of consumption needs. Of the atomic minerals viz. uranium and thorium—which not only promise tremendous energy potential, but give scope for scientific and technological advancement in a crucial area—fairly good reserves of thorium are found in India. India's reserves of chromite, titanium, refractories, abrasives, industrial clays, limestone etc. may also be considered satisfactory. Overall, it may be stated that India possesses the basic mineral resources required for industrial expansion. However, in relation to population, the reserves compare unfavourably with the important mineral regions of the world. India's recoverable reserves of mineral deposits, their probable depletion worked out on the basis of 'contemplated rates of exploitation' and the likely life span of these reserves at assumed future (1994-95) consumption levels are furnished below :

TABLE 1

Mineral Reserves and their Lifespan

	Recoverable Reserves in 1979	Likely Depletion during 1979-95	Recoverable Reserves likely at the end of 1994-95	Balance life after 1994-95
		(in million tonnes)		
Non-coking coal ..	37,000	2,640	34,360	126
Prime coking coal ..	2,700	330	2,370	74
Iron ore : Hematite ..	9,300	936	8,364	111
Bauxite ..	1,900	62	1,838	245
Limestone ..	53,000	1,020	51,980	519

Copper ..	3.20	0.77	2.43	32
Zinc ..	6.00	1.22	4.78	38
Lead ..	2.25	0.42	1.83	37

Source : Statistical outline of India.

The first major mineral discovery in India was of the coal fields in eastern India followed by the discovery of manganese, copper, gold, mica, graphite, iron ore, tin and others. There is still a long way to go as only about 50 per cent of the total land area has been explored for minerals till now. Geological surveys were first conducted during the period 1846-50. With the establishment of the Geological Survey of India, systematic and rapid progress started. Since then, the Geological Survey of India has been functioning as the principal agency for mapping and exploration of minerals. A network of other institutions and agencies in separate spheres of operation, has been carrying on extensive exploratory work in new and potential regions as also intensive explorations in known areas. These include Minerals Exploration Corporation, Indian Bureau of Mines, National Mineral Development Corporation Ltd., Manganese Ore (India) Ltd., Bharat Refractories Ltd., Bharat Aluminium Co. Ltd., Hindustan Copper Ltd., Bharat Gold Mines Ltd., etc.

At the time of independence, India was producing 22 minerals valued at Rs. 64 crores. By the turn of the last decade, 65 minerals (excluding minor minerals) were being produced for a total value of Rs. 1,883 crores. Progress was particularly impressive in the last two decades. In the period 1960-79 the value of mineral production (excluding atomic minerals) had registered a more than ten-fold increase (from Rs. 165 crores to Rs. 1,883 crores). It further rose to Rs. 3,612 crores in 1981 and to Rs. 5,055 crores in 1982. Data on value and index of mineral production in the period 1976-82 and the quantity and value of production of each of the important minerals are tabulated hereunder :

TABLE 2

Value of Mineral Production

Year	1976	1977	1978	1979	1980	1981	1982
1. Value of mineral production (Rs. crores)	1,364.9	1,466.4	1,561.7	1,901.6	2,255.7	3,611.9	5,055.2
2. Index of mineral production (Base 1970—100) ..	138	142	144	150	145	172	188

Note : Excludes atomic minerals.

(P) Provisional
(e) Estimated
N.A. Not available
* Excludes 702,000 tonnes of iron ores concentrates reported from Karnataka.
** It includes mine waste and waste obtained while dressing of crude mica at mine sites.

[1] Relates to gas utilised.

[2] Excludes the production of fire clay if any, recovered incidental to coal mining.

ALUMINIUM

Aluminium has come to be known as the 'metal of the future.' Its applications are diverse and it serves both domestic and industrial needs. It is much in demand in its own form and as a constituent in a wide range of alloys.

The area of application of aluminium is widening over the years. Besides its traditional uses, aluminium has also entered high technology areas replacing other scarce metals and materials. Also in recent times it has come to substitute other materials in many of the latter's conventional applications. For instance, the transportation industry has of late been replacing steel/timber with aluminium for truck bodies. The complete substitution of brass by aluminium for lamp caps and for heat exchanger tubing in the sugar industry has greatly enhanced its utility value. Aluminium lithographic sheets are ultimately expected to take over from zinc in high quality offset printing. Special grades of alumina are being used in the ceramic industry and for cast refractory furnaces, abrasives and spark plugs.

It is being said that there are more than 30,000 applications for aluminium in the world. In India, aluminium is being put to around 200 different uses. The major user of aluminium in India is the electrical industry, which accounts for more than half the aluminium consumed. Major portion of the electrical grade aluminium is being used for wire rods for the manufacture of conductors, winding wires and strips and cables of various types.

Bauxite is the basic ore from which aluminium is extracted. Bauxite deposits occur in the hill ranges of peninsular India, the Maikhala ranges, the Western and Eastern ghats. Smaller deposits have been discovered in the Vindhya plateau, Kharagpur Hills, Shevroy, Nilgiri and Palani Hills. Important States on the aluminium map of India are : Palaman and Ranchi districts of Bihar ; Mopa and Perneon in Goa, Surguja, Shahdob, Mandla and Bilaspur districts of Maharashtra, Madurai, Salem and Nilgiri districts of Tamil Nadu ; Jamnagar, in the Kutch in Gujarat ; Belgaum and South Kanara in Karnataka ; Kalahandi, Koraput and Sambalpur in Orissa and Banda district of U.P. Only in Jammu, however, high quality diasporic bauxite ore is found.

A recent significant breakthrough is the discovery of huge deposits of bauxite in the East Coast covering 25,000 sq. km in the Koraput district of Orissa and the Visakhapatnam district of Andhra Pradesh.

The Mineral Exploration Corporation has taken up a programme for the assessment of bauxite reserves in the Ratnagiri district of Maharashtra in order to ascertain whether the bauxite deposits in the area can sustain a large-sized alumina complex. The project which was to have been included in the Fifth Plan itself, could not be carried through at that time for want of resources. Its feasibility is being examined afresh, after a thorough reassessment and consideration of scaling up of size and adoption of energy-efficient technology.

In the year 1976, the Geological Survey of India embarked upon a time-bound programme of proving 500 million tonnes of reserve categories of bauxite in Andhra Pradesh and Orissa. Drilling took place at Sapparla, Gudem, Karhui and Chittamgondi in Andhra Pradesh. The thickness of bauxite/bauxite laterite intersected was found to vary between 4.45-24.9 m in Sapparla block, 3.5-17.5 m in Gudem block and around 8.35 m in Kathui block. Discoveries have also been made in Orissa.

India is self-sufficient in respect of bauxite. After meeting indigenous requirements, a sizeable quantity is also being exported. There are six aluminium smelters in the country, owned by four companies, of which one is in the public sector.

Bharat Aluminium Company is a public sector undertaking with a smelter at Korba in M.P. The Indian Aluminium Company (INDAL) operating smelters at Belgaum in Karnataka, Hirakud in Orissa and Alwaye in Kerala, Hindustan Aluminium Company (HINDALCO) with its smelter at Renukoot in U.P. and the Madras Aluminium Company at Mettur in Tamil Nadu operate in the private sector. The rated capacities of these leading producers are given below.

TABLE 4

Capacities of the Primary Aluminium Producers in India

Name	Smelter Location	Capacity (tpa)
BALCO	Korba (M.P.) ..	1,00,000
INDAL	(*a*) Belgaum (Karnataka)	73,000
	(*b*) Hirakud (Orissa) ..	24,000
	(*c*) Alwaye (Kerala) ..	20,000
HINDALCO	Renukoot (U.P.) ..	1,20,000
MALCO	Mettur (T.N.) ..	25,000
		3,62,000

Source : COMMERCE, June 30, 1984.

The National Aluminium Co., (NALCO) is to put up 2,18,000 tonnes smelter in Orissa. The smelter is scheduled to go into full production in 1986-87. It is said that this smelter, when it comes up, will be the largest aluminium smelter not only in India, but in the whole of Asia.

The trend in Aluminium production in India has been uneven and fluctuating, due mainly to irregular and inadequate power supply. The trend is traced below :

TABLE 5

Production of Aluminium in India

	Capacity	1981-82	1982-83	1983-84 (Provisional)
BALCO ..	100,000	34,754	43,454	60,400
INDAL ..	117,000	82,474	63,380	55,000
HINDALCO..	120,000	75,675	89,172	48,000
MALCO ..	25,000	13,860	12,140	6,600
Total ..	362,000	206,763	208,146	220,000

Source : Commerce : June 30, 1984.

Despite the fact India possesses ample reserves of bauxite, production of aluminium had lagged behind requirements. This state of affairs is primarily due to the low rate of capacity utilisation in the plants. The maximum utilisation rate achieved in the private sector last year was only 55%. INDAL, the largest of these with a rated capacity of 1,17,000 tonnes spread over 3 smelters in Karnataka, Kerala and Orissa was unable to utilise more than 44% of its capacity. All the three States of its operation were power-short in 1982-83. Orissa, in particular, had a severe power crisis in 1983 and the crisis persists in 1984 too. The smelter in Hirakud had to be temporarily shut down.

Judging by current indicators, the output of aluminium in 1984-85 will be short of target. Against a total installed capacity of 362,000 tonnes, a target of 285,000 tonnes was set, but production may not exceed 220,000 tonnes. This output level will not be sufficient to meet domestic demand and imports to the tune of 30,000-40,000 tonnes will be necessitated. The Government had to order imports of 30,000 tonnes of aluminium during 1983-84. In fact, the country had been forced to import aluminium for the past 5 years.

TABLE 6

Indigenous Production and Imports of Aluminium

Year		Production	Imports (in tonnes)
1980-81	..	1,99,017	1,18,180
1981-82	..	2,06,763	28,589
1982-83	..	2,08,146	19,256
1983-84	..	2,20,286	19,000

Source : Commerce, June 30, 1984.

Global Perspective

Due to its versatality of application, the consumption of aluminium is growing the world over. The growth rate of world consumption is around 9% per annum, much ahead of steel and copper. The trend of aluminium consumption in India is much below this, but there is no reason why India should not establish a growth rate similar to the world pattern. Despite possessing 8% of world bauxite reserves, India's production is only 1.5% of total world consumption.

If aluminium production is sufficiently stimulated, India has the potential to become one of world's major aluminium producers and even to emerge as a leading exporter of the metal. When the giant NALCO smelter in Orissa goes on full stream, India's production could more than adequately cater to internal needs. To find a ready market for this surplus, the association with Pechiney Legine Kulhman of France would be very helpful. International marketing should be sustained through a stable export/pricing policy so as to put the aluminium business on a permanent footing.

Research and Development

The need for improving quality to meet the growing requirements of a sophisticated market has been well-recognised by the aluminium industry in India. A novel, fast, accurate and economical method of analysing bauxite using X-ray Diffraction technique has been developed by the INDAL R & D Centre at Belgaum. Improvement of Bayer liquor productivity, more efficient precipitation techniques and improved red mud disposal methods have been worked out. New processes have also been developed for making ceramic grade and electronic grade alumina. Also new alloys and products such as super-purity condenser foil, new alloy for lamp cap stocks, thinner guage hard alloy for bus body panels etc. are being developed in an effort to improve the competitive advantages of a metal with vast future potential.

ANTIMONY

Antimony is used in alloys to increase the strength, hardness and resistance to corrosion and is used in many forms such as metal oxide antimonial lead and sulphide. It is required mainly in the manufacture of storage batteries, bullets, plumbing fixtures, tank lining, roofing sheets and chemical pumps.

Antimony deposits are found mainly in China, Bolivia, South Africa, Peru, Mexico, Europe, Japan, the U.S.A. and Australia. There are no major deposits in India though in 1917-18, 137 tonnes of ore was raised and from this 2.8 tonnes of refined antimony was extracted. Star Metal Refineries is the only unit extracting antimony metal in India, whose installed capacity is 1,000 tonnes of metals per annum.

For our domestic use, the entire quantity required is imported in crude ore and our main supplier is Bolivia. Demand for antimony metal is estimated to be around 1,000 tonnes per annum. There is no scope for creation of additional capacity at present.

CHROMITE

Chromite is an important strategic mineral of which India possesses moderate supplies. Deposits of chromite ore occur in Cuttack and Keonjhas districts in Orissa, Bhandara, and Ratnagiri districts of Maharashtra ; Singbhum district of Bihar ; Mysore, Hassan districts of Karnataka, Krishna district of Andhra Pradesh and Salem district of Tamil Nadu.

Chromite is used in the manufacture of ferro-chrome, basic refractories in the steel mills and in chromium chemicals. The entire demand for chromite is met from indigenous supply. In view of the existing demand from indigenous consumption and export being quite high relative to present supply, Government has accorded top priority for the exploration of this mineral in the potential belts, particularly Orissa. Out of the 14.8 million tonnes of ore reserves in Orissa, the measured category is just 2.2 million tonnes of *in situ* ore. The total reserves of *in situ* chromite ore in India, including lump and fine, are about 111.2 million tonnes.

COAL

The economic importance of coal hardly needs to be stressed. As a source of energy, it becomes a crucial ingredient of the production process. As a vital raw material to thermal power-generation and railway locomotive, it is a key material in keeping our economy's infrastructure alive. Coal has the highest forward linkage effect with steel, cement, fertilizer, electric power and a number of other industries. India continues to be the sixth largest producer of coal in the world, with an annual production of nearly 100 million tonnes.

The principal centres of coal in India are the Bengal-Bihar coal fields at Jharia, Raniganj, Bokaro and Karanpura ; the Madhya Pradesh coal fields at Pench-Kanhan, Bisrampur, Charcha, Jhilmili, Singrauli and Korba ; the Maharashtra coal fields at Kamptee ; the Orissa Coal fields at Talchar ; and the Andhra Coal fields at Singareni. The Bengal-Bihar belt contributes to about 60-65 per cent of the country's coal production Significant deposits of lignite are found in Neyveli in Tamil Nadu, Palana and Khari in the Bikaner district of Rajasthan ; Nichahom in Jammu and Kashmir, and in the Kutch and Bharuch districts in Gujarat.

Coal mining in India was first started at Raniganj, West Bengal in 1774. After independence, coal mining was stepped up and production has already risen from 32 million tonnes in 1950 to 130 million tonnes now.

The Government of India took over the management of coking coal mines in October 1971 and subsequently nationalised the coal mines and set up the Coal Mines Authority (CMA) in January 1973. Coal India Ltd. was formed in 1975 as a holding company, incorporating Coal Mines Authority, Bharat Coking Coal Ltd., Central Coal fields Ltd., Eastern Coalfields Ltd. and Western Coalfields Ltd. The Central Mine Planning and Design Institute is engaged in the designing of projects in both coal and non-coal sectors. The Singareni Collieries Co. Ltd., a joint public sector undertaking of the Government of India and the Andhra Pradesh Government is also engaged in coal production.

The proved, indicated and inferred reserves of all types of coal including lignite stand at 86,428 million tonnes with seams of 1.2 metres and above in thickness and generally upto a depth of 600 metres from the surface. Our reserves of coking coal is placed at around 23,000 million tonnes. Our main problem is that two-thirds of India's coal reserves lie too deep for profitable extraction under present technological conditions. Secondly, the reserve of good quality coal required for industrial purposes is limited. Also, poor quality coal cannot be transported economically for long distances. This underlines the need for the establishment of coal washeries and stowing as a method of preservation and better utilisation.

Washeries

Fifteen coal washeries are operating for the beneficiation of coking coal. There is also a small washery for the beneficiation of non-coking coal at Nowrozabad, Madhya Pradesh. A medium coking coal washery at Nandan, in Chhindwara district of Madhya Pradesh, with an estimated capacity of 12 lakh tonnes was sanctioned in November 1981. During 1982-83, two more washeries at Moonidih and Barora have been completed. The Coal Conservation and Development Advisory Committee, has been constituted under the Coal Mines (Conservation and Development) Rules 1975. Under its direction, work relating to conservation and safety in coal mines is undertaken directly by the coal companies.

Coal production in India in 1951 was 33 million tonnes. It was about 39 million tonnes in 1955 and rose to 78 million tonnes at the end of the Fourth Plan and to 101 million tonnes in 1977-78. Subsequently, it rose to 114 million tonnes in 1980-81, 125 million tonnes in 1981-82 and to 130 million tonnes in 1982-83 against a target of 142 million tonnes. The constraint of power along with other factors has been responsible for non-attainment of targets.

The demand for coal in the Sixth Plan was placed at 168 million tonnes excluding 5 million tonnes of middlings. The production target for the final year of the Plan, 1984-85 was originally fixed at 165 million tonnes. The projections, however, had gone haywire and the Planning Commission has revised the target downwards to 154 million tonnes. From current indications, even this target seems difficult to fulfil.

Eastern Coalfields Ltd. Bharat Coking Coal Ltd., (both subsidiaries of Coal India Ltd.) as well as Singareni Collieries Co. Ltd. suffered setbacks in production during 1983-84. The offsetting factor to these adverse developments was the higher contribution from Western Coalfields and Central Coalfields (the other two subsidiaries of the CIL) and the captive mines of Tata Iron and Steel Co. Ltd. The overall national output of coal during the first half of the year was therefore marginally higher than that for the corresponding period the previous year. The main factors that hit production adversely were power shortage and absenteeism.

Despite the loss of production, it is claimed that most of the consumer demand during the period has been satisfied. Despatches made to major coal consuming sectors have exceeded last year's supplies by about 4%. It may be mentioned that much of it has been achieved by drawing on the previous year's stocks lying at pitheads.

The biggest single consumer of coal is the power industry. Out of its assessed demand of 29.75 million tonnes including 1.75 million tonnes of middlings for the period April-October 1983, the quantity made available was 28.74 million tonnes i.e. 96% of the sector's demand. Demand satisfaction in some other major consumption sectors varied between 73 and 93 per cent. However, demand satisfaction in the steel sector has not been upto the mark. Out of the total assessed demand of 15.33 million tonnes of coking coal, the offtake was only 11.12 million tonnes or 73% of demand. The actual supplies during the above period to most sectors other than power and cement were lower than in the previous year. It is estimated that coking coal production would be around 30 million tonnes in 1984-85 and will go upto 40-42 million tonnes by the end of Seventh Plan. There is now a slow-down in coking coal plans because of lowered steel targets.

The Coal India Ltd. has opened a chain of stockyards in the country in order to improve the availability of coal and coke to industrial as well as domestic consumers at reasonable prices. There are 36 such stockyards in West Bengal, 9 in U.P., 5 in M.P., two each in the Punjab and Gujarat and one each in Chandigarh, Haryana and Orissa.

Problems

The quality of locally available coal is the cause for much problem. Good quality coal in India is found too deep down and the coal currently mined in the country is of unsatisfactory quality for industrial use and application. It has also been found out that coal mined is progressively deteriorating in quality. The ash content which used to be 15% some years ago has gone up to 24% in some cases. Such high ash content adversely affects the plants and equipment and causes maintenance problems, particularly in the case of steel plants. Blending it with imported coal does not always produce the right kind of coke.

It may be noted that the bulk of the increase in coal output in recent times has come from open cast mines. But prime coking coal occurs mainly in seams far below the ground and substantial investments in underground mining will be required to step up the raisings. In addition, it presents problems of oversize and the presence of stones amongst coal. The reason for this is the absence of proper coal-handling facilities in the mines. In several open cast mines developed after nationalisation, mining and loading operations have been mechanised; however, many of them are not equipped with coal handling plants that can properly size and segregate coal from other extraneous materials.

Measures for Improvement of Quality

The Coal India Ltd., has launched a multi-pronged programme to improve the quality of coal supplies, especially to steel plants and power houses. The strategy includes rationalisation of the sources of supply to washeries in order to improve the quality of raw coal and intensive crushing to the required size before loading on to the wagons. The Government has also sanctioned installation of captive power plants to meet essential requirements.

Government Strategy

Concrete proposals for modernization of the coal industry have been evolved. So far, the main thrust to government strategy appeared to be, to invest more in opencast operations than in underground mining. Production from opencast mines of Coal India Ltd. has risen from 39.96 million tonnes in 1980-81 to 45.67 million tonnes in 1981-82 and 53.62 million tonnes in 1982-83. Underground output went up only marginally from 61 million tonnes in 1980-81 to 63.27 million tonnes the next year, and fell to 61.19 million tonnes in 1982-83.

Production of coal does not match demand, resulting in complaints of scarcity. Even though there has been an increase in output over a period, the demand of many consumers who require special grades of coal remains unsatisfied even while large stocks of coal pile up at pitheads.

The Indian Coal Industry has therefore an urgent need for modernization. It must be noted that our expertise in modern technology for underground mining is rather limited. The Government has therefore sought and obtained assistance from various countries like West Germany, the UK, France, Poland and the USSR.

New Projects

In the context of these developments, work on new mines needs to be taken up speedily. There is at present a slackening in the pace of work on on-going projects. Unless new mines are taken up speedily, production programme to meet coal requirements will suffer severe setbacks. More than 90 projects are in various stages of constructions under Coal India and 8 projects are under construction in Singareni Collieries. All these would entail a total investment of Rs. 2,340 crores. Also, there are sixty-five smaller projects, entailing investments of Rs. 2-5 cores each under various stages of construction. Only with concerted and disciplined action on the implementation and commissioning of such fresh capacity and with a better perspective planning for customer-oriented production, demand from all consumer sections can be met.

Latest Discoveries

Huge deposits of coal of very high quality have been discovered in the trans-Ajoy extension of Ranigunj coalfields, according to the Geological Survey of India.

The occurrence of coal-seams in the virgin Dewangunj-Harisingha area of Birbhum district is likely to prove significant and might ultimately establish a linkage between the trans-Ajoy extension of Ranigunj coalfield and the Rajmahal group of coalfields. The thickness of these seams vary from 1.5 metre to 94.7 metres.

The Central Fuel Research Institute (Dhanbad) has reported that coal in these seams are of cleaner quality with as low as 25 per cent ash-content. The richest find (94.7 thickness) within a mineable depth of less than 450 metres is in Dewangunj areas.

The GSI review also reveals large coal deposits with seams varying in thickness from two metres to 20.15 metres in the Rajbar area of Auranga coalfields in Bihar, in Kalipahari-Scarsole area of Ranigunj coalfields in West Bengal and in the Sendurgar area of Hasdo-Arand coalfield of Madhya Pradesh.

COPPER

Copper ores occur in India mainly as veins, stringers and as dissemination and minor replacement patches along the foliation planes or factories of host shearzone rocks which include mainly the soda-granite varieties of murcovite and chlorite quartzschist with occasional layers of quartzite.

India's reserves of copper are not significant and a major portion of our requirement is met through imports. Copper ore is being raised from 16 major and minor deposits in the country. There are deposits of copper ore almost in all the States of India, totalling approximately 300 million tonnes. The major deposits are in the

Singhbum Copper belt in Bihar, Khetri and Alwar in Rajasthan, Agnigundala in Andhra Pradesh and in the Malanjkhand area in M.P. Small, but important deposits occur in Gujarat, Karnataka Sikkim, Maharashtra, Orissa and Mamandur in Tamil Nadu.

West Bengal	..	..	0.8

India's first copper concentration and smelter plants were erected in 1927 in Manbhandar in Bihar. Copper production in 1927-28, the first year of operations, was 6,000 tonnes. For 40 years thereafter there was very little further development in creating additional concentration or smelting capacity. The major breakthrough came with the commissioning of India's second smelter plant in the Seventies at Khetri in Rajasthan and the expansion facilities for reverberatory and flash smelters in Ghatsila. The two smelters at Khetri and Ghatsila are the only operating smelters in India till today. Construction of major open-cast mines is underway at Malanjkhand in M.P.

The development of copper industry has been reserved for public sector in India. Hindustan Copper Ltd., a public sector undertaking, is the sole producer of copper in the country. At the commencement of the Sixth Plan, the total capacity for blister copper was 47,500 tonnes. The Sixth Plan originally envisaged a capacity of 60,000 tonnes by 1984-85, but the schemes undertaken during the Plan period have already run into snags. The mid-term appraisal of the Sixth Plan has laid down that capacity be pegged to what it was at the beginning of the Plan. This is because, as per present indications, the expansion envisaged for the Khetri smelter may not materialize by the end of Sixth Plan. The Plan also provided for a yield of nearly 23,000 tpa of copper from the Malanjkhand project and 20,000 tpa from Rakha (Phase II) in Bihar at the completion of exploration in these mines. Expansion work is being undertaken at Mosaboni Surda and Chandinari.

Production

Production of blister copper in India in recent past has been tabulated below :

1984-85-original	..	47.5
(target)-revised	..	42.0

Source : The Economic Times, Feb. 8, 1984.

These production figures must be viewed against figures of estimated consumption, which for the years 1982-83 and 83-84 were worked out as 100,000 tonnes and 108,000 tonnes respectively. Production corresponding to these may be read from the foregoing table as 35,000 tonnes and approximately 40,000 tonnes. Thus, it is evident that domestic sources cannot take care of even 50% of the consumption requirements of the country. In the year 1982-83, HCL could produce only 35,000 tonnes of copper as against its rated capacity of 47,500 tonnes.

Dependence on imports is, therefore, heavy and it is likely to continue so in the foreseeable future. In view of the persistent uptrend in the price of copper in the London Metal Exchange, import bill on this account is likely to be substantial. In the recent past imports of copper have been around Rs. 150 crores. Even though production figures of copper show a steady rise through the years, targets have often been missed. In 1981-82, as against a target of 32,500 tonnes, the actual production was only 27,400 tonnes. In 1982-83, even though output itself registered good improvement at 35,000 tonnes, it was still short of the target by 2,000 tonnes. The annual plan for the year 1983-84 envisaged a target of 40,000 tonnes of copper, but according to authoritative assessment, output of copper for the year would be only around 33,000 tonnes. This is not only a shortfall from target but an actual decline from the previous year's level.

Capacity Utilisation

The capacity utilisation of copper smelters in the country has improved from 53.2% in 1980-81 to 57.7% in 1981-82 and 73.7% in 1982-83. This was possible due to the imports of copper concentrates in sizeable quantities. There were shortfalls in production at the mines and concentrator plants and this meant smelter usage would be accordingly at a lower level. However, the effect of reduced domestic output that would have hampered fuller capacity utilisation was offset by import of concentrates that enabled smelter capacity utilisation at a stepped-up level.

Future Demand-Supply Gap

It is hoped that when Phase II of the Malanjkhand mining project becomes operational, import of copper concentrates could be done away with. Imports have hitherto served to bridge the gap between demand and supply and in recent years these have been of a greater magnitude than domestic production. In the next five-year period too, indigenous production of copper is expected to lag behind requirements, necessitating imports on a fairly large scale. According to current, estimates, demand-supply gap in 1989-90 would be 65,000 tonnes. But this is subject to the materialization of various expansion schemes of HCL as per schedule. Projections given by a Working Group on non-ferrous metals, however, put these estimates at still higher levels.

TABLE 9

Copper : Demand, Domestic Supply and Import Needs in India

	1983-84	1989-90
	(tonnes)	
1. Original estimate of demand ..	95,000	1,23,500
2. Estimate of HCL production ..	33,000	58,500
3. Gap (to be met through imports) ..	62,000	65,000
4. Demand estimate of the working Group on NF metals ..	1,08,000	1,57,600
5. Gap as per estimates given by item (4) above	75,000	99,100

Source : The Economic Times, Feb. 8, 1984.

While making an assessment of the situation, taking into consideration the snags that periodically hit copper production programmes, it may be reasonable to expect a shortfall anywhere between these two estimates.

Problems

The major hurdles in the way of copper production in the country are the high cost of production and inadequate power supply arrangements. Cost of production of copper is ruling very high in India due to poor recovery and technical difficulties in the smelter plants. This apart, there have been delays in the integrated development of copper belts as well as delays in the commissioning of the project. These naturally involve cost-overruns due to escalation of prices.

The other serious problem is the inability of the State Electricity Boards to ensure adequate and continuous power supply. This has all along stood in the way of fuller capacity utilisation of existing mines and in setting up new mining facilities. Last year, however, the power crisis assumed critical proportions when supply was hardly sufficient to take care of the minimum requirements of mine safety, water supply and lighting, leading to severe curtailment of operations in the mines, concentrators and smelters. This has led to considerable loss of production. This amounted to 7,318 tonnes in 1979-80, 8,290 tonnes in 1980-81, 3,886 tonnes in 1981-82 and 6,488 tonnes in the first eight months of 1982-83.

Effective tackling of these problems in order to expand capacity and production is only partly in the hands of the HCL. The Corporation can take steps to overcome the technological bottlenecks. Proper organisation of research and development and transfer of technology, where necessary, can be carried out for the development of more efficient mining and extraction techniques.

However, the situation on the power-front looks grim and requires Government measures on a long term basis. Both the major smelter complexes at Khetri and Ghatsila are plagued by shutdowns, interruptions and general shortfalls in supply in relation to requirements. The problem is particularly severe at Khetri. Already plan projections in the matter of capacity creation have been scaled down and if planned schemes are not to go away further, utmost priority has to be accorded to ensure adequate power supply.

DIAMOND

Mining of diamond in India is only on a small scale, the country's known reserves being limited. The Panna diamond belt is the only significant diamond-producing area in the country. It is spread over the districts of Panna, Chhatarpur and Satna in Madhya Pradesh as well as some parts of the Banda district of Uttar Pradesh. Diamond reserves in the Panna belt are placed around 5,79,000 carats. There is also a diamond field in the South which stretches over Anantapur, Cuddapah, Kurnool and Krishna districts of Andhra Pradesh and Bellari in Karnataka. Another discovery has been made in the jungle area of Mirzapur in U.P. where incidence of Kimberlitic pipe rock has been observed.

However, significant trade in diamonds is being carried on in the country. Processing, cutting, polishing and export are carried on through an extensive domestic network. The availability of technical and talented manpower has put India firmly on the world diamond map. India has now achieved the distinction of being the largest exporter of diamonds. In the year 1983, the country topped the international list with exports of Rs. 1,165 crores which is Rs. 115 crores higher than that of its nearest competitor Israel. The figure also represents a 32% increase over the value of diamonds exported by India in the previous year. This excellent performance was made possible because of India's immense competitiveness in cutting and polishing in the world diamond market, cheap labour costs, backed by extensive network of cutting and polishing centres and the availability of skilled manpower has made our exports competitive.

India has also achieved an expertise in cutting small and low grade diamonds, which no other country is able to match at present. Apart from all these factors, the industrial recession in the West served to steer the demand towards smaller and less expensive stones, thus giving a boost to Indian exports.

1982-83	..	91,277

GOLD

Being malleable and ductile, gold has great utility value which is enhanced by its inherent qualities of indestructibility, scarcity and shining splendour. It is of immense use for both ornamental and monetary purposes. Gold mining in India has a colourful history. Initially, it was mined primarily as an employment source for expatriate British and French soldiers. Later, the Kolar gold fields were selected for exploitation. Four companies came into operation and very nearly exhausted all the ore, and were on the verge of closing down by 1947. After independence, however, complete shutdown could not be resorted to on account of problems of re-employment and rehabilitation of the work force. In 1956, the Mysore and Nandydroog mines were nationalised and in 1972 the Company became a Government of India undertaking. The Hutti mines were taken over by the Karnataka Government. Despite constraints of high costs of production and severe competition from smuggled gold, the Kolar fields are still being operated. The Kolar reserves are expected to last another 15-18 years and the Hutti mines for another 15 years. Also there is another group of gold mines viz. Ramagiri gold field in the Anantpur district of Andhra Pradesh. Traces of gold have also been discovered near Telkoi in Kashmir and the ore is said to have shown presence of gold upto 64 grams in a tonne of quartz.

At present, Karnataka is the only gold-producing State in India. The estimated gold ore reserves in the country are placed at 8.7 million tonnes with a total gold content of 64.93 tonnes. Of this, Karnataka possesses 5.8 million tonnes of gold ore reserve with a total metal content of 49.24 tonnes.

Gold mining is carried on in India only in the public sector. The Bharat Gold Mines Ltd., was incorporated in 1972 as a public sector undertaking of the Government of India to own and manage the Kolar Gold Fields. The entire gold produced by the company is taken over by the Central Government at International Monetary Fund rates.

Gold has an added dimension to its intrinsic value, as it is widely held as a financial asset. It has served as the 'numeraire' in the past centuries and was used in coinage. Its relative scarcity and high value together with the phenomenon of inflation and erosion of the monetary units in value, have inevitably led to the present day situation of a monetary flooding by paper currency. Still gold is held by the Government treasuries and Central Banks as backing for currency. There is public demand for gold on account of both precautionary and speculative motives. Thus gold prices are of special significance and are carefully watched over and monitored. Shifts in gold prices cause repurcussions in the financial markets. During the Seventies, gold prices were on a continuous upward trend, and particularly in the second half of the decade. The rate of price increase was quite alarming. This unprecedented spurt in activity in the bullion market was mainly due to the utilisation of surplus reserves of the petroleum exporting countries in buying large quantities of gold. Recently, with oil prices not on such firm footing, this demand for gold has not only reduced, but some oil nations in need of revenue, have been actually selling gold. Iran, since the outbreak of its war with Iraq, has been virtually on a selling spree. The revenue needs of the two largest gold producers, the USSR and South Africa, which between them produce nearly four-fifths of the world aggregate, have also contributed to the downswing in gold prices. The decline started since late 1979 and became steep after January 1980. From a peak level of $ 850 an ounce in 1980, prices came down to $ 312 in March 1982. There was some stabilisation thereafter and in August 1984, London gold was quoted around $345-350.

The Indian bullion market is however insulated from world price movements. The nosediving in 1979-82 phase was not fully reflected here and the domestic market registered only marginal fall. This isolation of the Indian bullion market was brought about by the total ban on import and export imposed in 1947. The enormous

Indian propensity to consider gold as a status symbol and an insurance against inflation, its continued liquidity, the convenience it offers for hoarding black wealth and the absence of a strong alternative form of saving have all contributed towards its continued value and arrest any substantial decline in its prices. Price set-backs, if any, are small and irregular and occur during seasons of limited activity. In August 1984, with the festival season a little away, standard gold and ornamental gold were ruling steady respectively around Rs. 1950 and Rs. 1,890 per 10 grams.

IRON ORE

India is one of the few countries in the world endowed with large reserves of good quality iron ores. Our reserves can meet the growing needs of the indigenous iron and steel industry and also sustain considerable export trade.

Iron ore occurs in different forms with varying qualitative contents as hematite, magnesite and siderite. Large reserves of hematite occur in the Bihar-Orissa belt, Madhya Pradesh, Eastern Maharashtra, Bellary-Hospet area and Goa. Deposits of iron ore have also been discovered in Calicut in Kerala, Goankhadi and Ratnagiri taluks of Maharashtra and in the Singhbum district of Bihar. Mineral Exploration Corporation is carrying out exploratory mining in Bihar to strengthen the reliability of reserves established earlier. India is estimated to possess nearly a thousand crore tonnes of hematite ore containing 55 per cent or more of iron. Besides this, about 470 crore tonnes of Magnesite ore reserves with an iron content ranging between 25-62 per cent have also been estimated to exist in the country.

In Kudremukh in the Chikmagalore district of Karnataka, India has the biggest iron ore mining project, which is expected to make a significant contribution to the export earnings of our country. Though the iron ore belt had been discovered as early as in 1913, it was considered as very low grade magnesite ore and remained unexploited till recently. Recent studies however, have proved that the project could be economically viable with the development of the technology of beneficiation and transportation of solids in slurry form. The project was, therefore, taken up under an agreement with the Iranian Government, which was to supply the credit. India was under a contractual obligation to export 150 million tonnes of ore concentrate over a period of 20 years. Subsequent political developments in that country, however, have resulted in a much reduced offtake. Therefore, it is proposed to set up pelletisation facilities at Mangalore for part of the iron ore from Kudremukh. The possibility of setting up a pellet plant at Bailadilla is also being explored.

Iron ore production which was around 17 million tonnes in 1960 and 24 million tonnes in 1965, has increased considerably to 39 million tonnes by 1980. The investment programme for the production of iron ore in the Sixth Plan has taken into account not only the growing needs of the domestic steel industry but the possibilities of increased exports as well. On this basis, a production target of 60 million tonnes has been set up for 1984-85, comprising of 28 million tonnes for domestic consumption and 35 million tonnes for exports. In order to maintain the export of iron ore through Vizag Port at the level of about 6 million tonnes and at the same time to meet the requirements of the Vizag Steel project, it has been proposed to take up the development of new mines in the Bailadilla zone.

Iron ore is the largest foreign exchange earner for India among minerals. India has been exporting roughly 60 per cent of its iron ore production every year. The bulk of the export is being channelised through the MMTC and the rest of the export is carried on by a few private parties mostly based in Goa. The MMTC had set itself an export target of 16 million tonnes for the year 1981-82, which had been accomplished.

Our major buyer of iron ore is Japan. Other countries which import Indian Ore are Rumania, South Korea, Iran, Kenya, China, the UAE, Hungary, East Germany, Yugoslavia and Czechoslovakia.

The world steel industry was badly affected by recession of the early eighties which in turn adversely affected international iron ore trade. Off-take by major importers, particularly Japan which imports more than 100 million tonnes a year was curtailed. Indian iron ore exports which reached a peak of 26 million tonnes by 1981-82 declined to 22 million tonnes in 1982-83. The sharp drop in the volume of exports was not reflected to the same extent in earnings which declined only by 3 per cent because of higher unit value. Unit value of realisation increased from Rs. 166.06 in 1981-82 to Rs. 212.63 in 1982-83. The year 1983-84 was yet another difficult year with Japan forcing a cut not only in volume, but also in price, the price-cut was to the tune of 12.5 per cent.

Export problems were compounded by a massive landslide which disrupted railway traffic between Bailadila mines and the Vizag port. This meant a loss of export of about a million tonnes. However, prospects of shipments to Japan are expected to improve with the deepening of the Madras outer harbour to handle 140,000 dwt. vessels. Also a recent development that brought cheer to the Indian iron scene is the acceptance by Japan for purchase of 30 million tonnes of Bellary—Hospet ore at current prices over ten years beginning from April 1984. It is also expected that one million tonnes of ore from Kudremukh will be shipped this year and export possibilities to Romania, Czechoslovakia, China and other countries are being explored.

KYANITE, SILLIMANITE AND MAGNESITE

Kyanite and sillimanite are important refractory minerals with an identical chemical composition i.e. $Al_2O_3SiO_2$, but differ in physical and crystallographic properties. The known productive deposits of Kyanite are the Lapsa Buru deposits in Singhbhum district of Bihar and the Dahegaon—Pimpalgaon deposits in Bhandara district of Maharashtra. Small quantity is also found in Karnataka. The total estimated reserves of kyanite are about 30 lakh tonnes.

Deposits of sillimanite are found all over India. Largely, sillimanite occurs along with ilmenite. It occurs rutile in the beach sand deposits of Kerala, Tamil Nadu and Orissa. However, production is only from Meghalaya, Maharashtra, Madhya Pradesh, Tamil Nadu and Kerala. The major production is from the famous Sonopahar mines in the Khasi Hills of Meghalaya. Sillimanite sand is recovered as a by-product from ilmenite processing in Kerala and Tamil Nadu. The total estimated reserves of sillimanite are about 12 million tonnes.

Indian sillimanite can be used as a refractory without calcination since it shows very little expansion. India occupies an important position as a producer and exporter of these minerals.

Magnesite, the other important refractory mineral is found in Salem district of Tamil Nadu, Almora, Thamoli and Pithoragarh districts of the U.P. and in Mysore and Hassan districts of Karnataka. The total estimated reserves are about 210 million tonnes.

LIMESTONE

Limestone is used mainly in the cement, iron and steel, paper, chemicals, glass and sugar industries as a raw material. Its industrial applications thus span a very wide spectrum. Limestone occurs in almost all the states of India. Deposits of the mineral are also found in the Himalayan region, Assam, Meghalaya and Kashmir which are yet to be exploited.

The limestone requirements of the cement industry alone have been projected to be around 5000 million tonnes and at the present rate of exploitation of our existing reserves, a shortfall of around 2,000 tonnes is anticipated. To meet this, a systematic and planned exploitation of the existing, new and other lower grade deposits should be undertaken.

MICA

Mica has excellent electrical, thermal and mechanical properties and hence has great demand from many industries. The principal mica deposits are concentrated in Bihar, Rajasthan and Madhya Pradesh. Small deposits are also found in Tamil Nadu, Andhra Pradesh and West Bengal.

There are two mica insulation brick factories based on scrap at Bhilwara and Bokaro. There are also micanite factories at Bombay and Bhopal.

India accounts for a big slice in the world mica market. However, our mica exports have declined in the recent past, which in turn had an adverse impact on domestic production. There is, therefore, a need to promote the export of mica-based products. A recent phenomenon is a world-wide decline in mica consumption. Therefore, market surveys for identifying potential areas of development and, research and development for product diversification should be undertaken.

MANGANESE

Manganese is an important input in the iron and steel industry, chemical industry, in the manufacture of batteries, and in other areas. Extensive deposits of manganese ore occur in Madhya Pradesh, Maharashtra, Orissa, Andhra Pradesh, Karnataka, Bihar, Rajasthan and Goa.

Total reserves of manganese ore in the country are estimated at around 116 million tonnes. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Maharashtra and Balaghat in Madhya Pradesh alone contain reserves around 20 million tonnes.

There are at present eight major ferro-manganese plants in the country with a total installed capacity of 2,32,400 tonnes per annum. Of these, 3 units are located in Maharashtra, two each in Orissa and Karnataka and one in Andhra Pradesh. The last unit to commence production was Maharashtra Electrosmelt, Chandrapur with an installed capacity of 50,000 tonnes of ferro-manganese per annum. Most of our domestic requirement of Manganese ore is met from indigenous production.

NICKEL

Nickel is not produced on a significant scale in our country and so we import it to meet our domestic needs. The import of nickel has risen from nearly 4,000 tonnes in 1974-75 to 6,500 tonnes in 1980.

The first major project for the production of nickel is programmed in the public sector at Sukinda, in Orissa with a capacity of 4,800 tonnes of nickel and 200 tonnes of cobalt per annum. Proposals for taking up a feasibility study for setting up the plant by a competent foreign agency are under consideration.

The total reserves of nickel in India are placed at 160 million tonnes. Nickel ferrous laterite ore is found in Sukinda, Orissa, and this is roughly the equivalent of 0.67 million tonnes of metal in the ground. Nickel ore deposits of 2-3 million tonnes have been discovered in the Similpal area of Mayurganj district in Orissa, during the preliminary survey conducted by the Geological Survey of India. The deposits cover an area of 300 sq. miles.

India's per capita consumption of nickel is relatively very low. Still, internal demand is expected to reach 4,100 tonnes per year and our own production has to increase to match the demand at least to some extent.

ROCK PHOSPHATE

Rock phosphate is an important input of the fertiliser industry, while a small amount is consumed by the chemical industry also. Domestic consumption of this mineral is keeping pace with the development of the fertiliser industry. The increase in consumption of rock phosphate has jumped from 36,000 tonnes in 1955 to 8,91,000 tonnes in 1975. The fertiliser industry is the major consumer accounting for over 90% of the rock phosphate produced. Since 1965 the chemical industry has been increasing its consumption of rock phosphate. Till 1969, the entire domestic consumption was met from imports. Recently, large deposits were discovered and developed in Rajasthan and since 1975, almost 50% of the rock phosphate consumed has been produced indigenously.

Rock phosphate occurs in three types of deposits i.e. apatite deposits, phosphorite of marine sedimental origin and guano type of deposit, in the U.P. and Rajasthan. While 50,000 tonnes of apatite reserves have been ascertained in North Arcot district of Tamil Nadu, there are inferred reserves of one million tonnes, the possibilities of which have to be explored. Besides this, apatite deposits of commercial importance are reported to occur in Bihar, Andhra Pradesh, Rajasthan and West Bengal. Deposits of phosphorite are located in Chhatarpur, Sagar and Jhabua districts of Madhya Pradesh ; Udaipur, Jaisalmer and Banswara districts of Rajasthan and Dehradun, Tehri and Lalitpur districts of Uttar Pradesh. The estimated reserves of rock phosphate in the country are placed at 138.6 million tonnes.

SILVER

This white, resplendent metal commands a pride of place among metals next only to gold and platinum. It has good domestic and industrial uses. Silver is produced on a small-scale in India and is also being exported. As an expensive metal, it earns considerable foreign exchange. India exports silver to the New York, London, Paris, Zurich and Frankfurt markets. Silver production in India varies around 15,000 kg per year.

Domestic consumption of silver during 1983 (according to some reports) has been placed at 218 million ounces. This represents a decrease of around 7,00,000 ounces from the previous year's level. India's contribution to the markets of the non-Communist world was placed at 46.8 million ounces of silver during 1983. The corresponding figure for 1982 was 33.4 million ounces. However, since India has banned export of silver since February 1979, these exports have come about unofficially as unauthorized exports.

The World Scene

It has been estimated that the world consumption of silver for industrial and coinage use during 1983 was approximately 366.6 million ounces which represents a slight increase over the previous year's consumption of 361.5 million ounces. World mine production during 1983 was 308 million ounces, this is an improvement over the previous year's production level of 294.7 million ounces ; the increase is to the tune of 5 per cent.

Silver Price

Speculative and investment activities continue to dominate the silver market and price movements are therefore often unpredictable. The year 1983, for instance, opened with a market price of $ 10.20 per troy ounce and reached $ 14.74 on February 16. This later proved to be the peak level for the year. After a series of downswings and upswings, the price reached a trough level of $ 8.34 on November 17. However, these erratic price fluctuations have little relationship with the commercial demand, but represent speculative reactions to a number of events. The fundamental factors that influence this market pattern may be listed thus : (1) Inflation-led-speculation resulting in price volatility. (2) Business recovery or indications of business recovery giving rise to a spurt in demand. (3) Substantial shift in supply-demand balance position since mid-1979. Since then, silver production from new mines and supplies from secondary source have together exceeded industrial consumption requirements to meet which users of silver had previously to resort to speculative accumulation of silver. (4) The flow of silver into the world market from India and other secondary sources has been an important factor in the supply equation. The volume of this flow is particularly responsive to price changes, increasing with price rise and diminishing with price decline.

These factors are likely to exert a continuing influence on the silver market. Therefore, the outlook for silver in the period immediately ahead will not be very different from the prevailing conditions. Logically, the present market pattern would persist, barring unforeseen developments.

SULPHUR

Sulphur is used mainly in the production of sulphuric acid apart from being used in the manufacture of wood-pulp, rubber, fireworks, metallurgical compounds, petroleum-processing, fungicides, insecticides and carbon disulphide.

India is practically devoid of deposits of elemental sulphur. The important deposits of pyrites are those of Amjhore in Rohtas district of Bihar and Saladipura in the Sikas district of Rajasthan. The only deposits of sulphur are found in the Puga Valley of Kashmir, but due to difficult terrain conditions, these deposits have not acquired due economic importance. Three alternative sources of recovering sulphur for reducing the dependence on imports have been adopted : (i) recovery of elemental sulphur from petroleum refineries (ii) production of by-product sulphuric acid from zinc and copper smelters and (iii) production of sulphuric acid from pyrites. Madras Refinery Ltd. is the only plant from which elemental sulphur is recovered during the refining of crude petroleum. Sulphuric acid, however, is produced on a large scale, as a by-product in the production of fertilisers and in the smelters of zinc, copper and other non-ferrous metals.

The Pyrites and Phosphate Chemicals Limited operates with a capacity of 400 tonnes of pyrite ores per day. Based on these pyrites, two sulphuric acid plants have been set up in Sindri. In order to meet their requirements fully, the PPCL has embarked on a new scheme to produce 900 tonnes of pyrites a day.

URANIUM

Uranium has acquired great importance as the most strategic of minerals, in view of its application in the crucial sector of nuclear development. For military uses as well as, as a source of atomic energy, it is in great demand.

The southern fringes of Shillong have a significant concentration of uranium. It has also been detected in the Karba-Anglong district of Assam, in the valley of the Jayantya Hills of Meghalaya and in the Judugoda mines of the Singhbhum district of Bihar, in U.P. and Himachal Pradesh. Investigations for uranium and other atomic minerals in Andaman and Nicobar group of islands is currently under progress. Deposits have also been found in Narwapahar and Turamdih areas located in the mineralised belt known as the Singhbhum thrust belt in Bihar. The state-owned Uranium Corporation of India has projects in these areas as also at Bodal in Madhya Pradesh. It is also believed that India has excellent potential for discovering new and additional reserves of uranium. About 73,000 tonnes of indicated and inferred categories of uranium ores have been identified, with the major part of exploration efforts concentrated in the Singhbhum thrust belt in Bihar and parts of Rajasthan. Uranium occurrences in Karnataka have also been established in North and South Kanara along a 165 km. stretch from Goa border in the north to Mangalore in the South. There were three drilling prospects in this belt which were under exploration. By and large, the grades of uranium ores present in the country are much lower than those present elsewhere in the world.

ZINC AND LEAD

The known reserves of lead-zinc ore are located in Andhra Pradesh, Orissa, Gujarat and Rajasthan. Lead ore deposits are known to exist in Agnigundala in Andhra Pradesh and Sargipalle in Orissa. The total reserves have been estimated at about 350 million tonnes which in terms of metal content amount to 18.4 million tonnes of lead and zinc.

Only 50 per cent of our domestic requirements are met by indigenous production. Work is under progress in respect of several new mines including the Central Mochia mines in Zarwar, Balaria, Rajpura and Dariba.

Primary zinc production in India is being carried on by Hindustan Zinc Ltd., in the public sector and Cominco Binani Zinc Ltd., in the private sector. The principal objectives of Hindustan Zinc Ltd. are mining and smelting of lead-zinc metal and production of allied products. The company owns seven mines and operates three smelters. The mines are ; (1) The Zawar Group of mines in Rajasthan ; (2) Maton rockphosphate mines also in Rajasthan ; (3) Agnigundala Lead mines in Andhra Pradesh ; (4) the Rajpura Dariba mines in Rajasthan which are under development; (5) Sangipalli lead mines in Orissa, also under development ; (6) Rampura Agucha deposits under exploration in Rajasthan ; and (7) Baroi deposits in Rajasthan which are also in the exploration stage.

The Corporation also operates a zinc smelter in Debari in Rajasthan, a lead smelter in Tundoo in Bihar and a zinc-lead smelter complex in Visakhapatnam in Andhra Pradesh.

Primary lead is being produced by Hindustan Zinc Limited which operates 2 lead plants, based on indigenous ore. The plant at Tundoo in Bihar is fed with the ores from Rajasthan and has a capacity to produce 8,000 tonnes per annum. The lead plant at the Zinc smelter complex at Vizag has a 1,000 tonne capacity.

In addition to these, Indian Lead Pvt. Limited has 2 units in Maharashtra and West Bengal for the production of secondary lead with a licensed capacity of 31,500 tonnes per annum. A project for producing 6,400 tonnes per annum of lead at Sargipalli has also been sanctioned. Both zinc and lead are imported in substantial quantities.

Lead-Zinc deposits are also found in the Rampuragucha area, detailed exploration of which has been completed. This has revealed a very large ore reserve potential considered adequate for an investment decision. Consultants for the preparation of the detailed project report for the mine and concentrator have been selected. Another project viz. the Rajpura-Dariba lead-zinc project is under construction. The commissioning of this project will help in progressively reducing the import of concentrates for the Vizag smelter.

RARE MINERALS

The Department of Atomic Energy carried out a number of investigations which revealed the presence of certain radioactive mineral deposits in India. The beach sands of Kerala and Tamil Nadu contain Monozite, a useful radioactive mineral. Monozite contains thorium, uranium oxide, phosphate and a large percentage of rare earth oxides. Thorium can be converted into an important atomic fuel. The total reserves of these rare earth oxides in the beach sands have been estimated at approximately one million tonnes. Reserves of thorium are estimated at 500,000 tonnes.

Ilmenite occurs mainly in the Eastern and Western Coasts of India. It is recoverable from the beach sands of Kerala and Manavalakurichi area in Tamil Nadu. Other workable deposits are found in Orissa. Total inferred reserves of ilmenite in beach sands have been placed at around 54 million tonnes. Ilmenite from India is currently being exported to Japan.

Deposits of niobium—tantalum bearing minerals have been established in the southern parts of Karnataka and Andhra Pradesh. Many other, atomic mineral occurrences, including thorium had come to light in parts of Andhra Pradesh Tamil Nadu, Kerala and Karnataka. These are being investigated. An Atomic Minerals Division Laboratory is being established and this, in association with various scientists and universities would *inter alia*, carry out Research and Development work and analyse the economic aspects of exploration. Sophisticated methods such as remote sensing and gamma ray spectrometric survey are being introduced in exploration operations.

OCEAN MINING

Through the efforts of the National Institute of Oceanography India has entered the Ocean Mining Club whose present membership consists of the U.S., West Germany, France, the U.K., Japan and the USSR. Grey and black potato-shaped nodules have been discovered in the deep sea bed in the Indian Ocean. These nodules are reported to contain nickel, copper, cobalt, manganese, iron and even traces of gold. This significant technological discovery has no doubt opened the door to a mine of possibilities. As these are located well within the accepted economic zone, India can initiate researches in mining, recovery and beneficiation of these under-sea minerals. More interesting possibilities are indicated in the central sector of the Indian Ocean where ' stretches of the ocean floor are carpeted ' with rich and high grade nodules.

RESEARCH AND DEVELOPMENT

The Department of Mines has formulated a 10-year profile for the development of mineral resources in the country. Research and Development activities are to be given a major thrust in the public undertakings and organisations under the Ministry, covering areas of geology, exploration, mining and non-ferrous metallurgy. Rs. 5.5 crores is expected to be allocated for such programmes under the Sixth Plan.

Major schemes under implementation include micro-seismic project for rock-burst research, scheelite recovery from gold ore, facilities for ore-dressing, extractive metallurgy, recovery of copper by dump leaching and a pilot plan for improvement in copper refining.

Programmes and Targets

It is a recognised fact that while India is well-endowed with ferrous minerals, resources of non-ferrous minerals are very limited. The development strategy has, therefore, to provide for a judicious balance between imports and local production, coupled with emphasis on prospecting and increasing the known inventory of resources.

Past experience has shown that in the cases of aluminium, copper, zinc and other metals, production has been considerably affected by shortage of power. Therefore, in future, in the implementation of major projects, possibilities of providing for captive power generation have been given due consideration. The Sixth Plan envisaged the following programmes :

(*a*) completion of existing schemes ;

(*b*) investment in mining and smelter capacity to correct imbalances and to substantially increase outputs with minimum outlay ;

(*c*) establishment of a large alumina/aluminium complex at Orissa geared to meet domestic and export needs ;

(*d*) exploitation of the zinc-lead deposits recently discovered at Agucha in Rajasthan. Additionally, the possibility of taking up another alumina/aluminium complex based on the bauxite deposits of Andhra Pradesh will be explored.

As a result of the investments proposed, a substantial increase in the output of non-ferrous metals is envisaged by 1984-85. Import however, would have to continue.

TABLE 11

Capacity and Production Estimates of Selected Minerals

Industry			1984-85 Targets Capacity	(In M.T.) Production

ASSOCIATED MINING INDUSTRIES LTD.

FOUNDED in 1941 at CALCUTTA. Converted into a Public Limited Company in 1946. **Directors :** R. K. Agarwala, R. C. Bhotica, R. N. Agarwala, C. K. Agarwala and Begraj Gupta. **Registered Office :** Post Box No. 727-4, Lyons Range, Calcutta-1. Telegrams : 'MITHAL', Telephones : 22-6494 to 97. **Auditors :** Messrs. Price, Waterhouse & Co.

Objects and Activities : Mica mining and manufacturing refractory materials such as silica bricks and firebricks. The company also carries on the production of mica at Gangapur and Chidkhers.

CAPITAL : Authorised : Rs. 29,00,000 in 10,000—5% Cumulative Preference shares of Rs. 100 each, 1,45,000 Ordinary shares of Rs. 10 each, 90,000 Deferred shares of Rs. 5 each. **Issued and Subscribed :** Rs. 23,02,000 in 10,000—5% Cumulative Preference shares of Rs. 100 each, 89,200 Ordinary shares of Rs. 10 each and 82,000 Deferred shares of Rs. 5 each. **Called-up :** Rs. 18,02,000 in 10,000—5% Cumulative Preference shares of Rs. 100 each, Rs. 50 per share called-up; 89,200 Ordinary shares of Rs. 10 each fully paid-up and 82,000 Deferred shares of Rs. 5 each fully paid-up.

Date of Accounts : 31st December. **Registration Fee :** *Nil.* **For Split** or **New Certificate :** Rs. 2.

The company owns a controlling interest in Reliance Firebrick and Pottery Co. Ltd.

BHARAT ALUMINIUM CO. LTD.

(A Government of India undertaking)

Directors : I. M. Aga (*Chairman-Managing Director*), D. Bandyopadhyay, I. G. Jhingrar, R.S.V. Subramanian, P. S. Rao. **Secretary :** B. J. Rao. **Registered Office :** 'Punj House', 18, Nehru Place, New Delhi-110 019. Telegrams : 'RATNAKOREA' Telex-031 2900/4526 Telephones : 681482-3, 681911-12, 682562-63. **Auditors :** Messrs. V. K. Mehta & Co.

Objects and Activities : Manufacture of aluminium, hot metal, aluminahydrade, bauxite etc.

A unit for supply of lime is under construction. The company has also selected 9 units for making wooden boxes required for packing aluminium extrusions and rolled products. The Ratnagiri project was envisaged to have an integrated aluminium project of 50,000 tpa based on the bauxite deposits of Dhangarwadi and Udgiri in Kolhapur district of Maharashtra. Government sanction has been received but the implementation of the project has not yet been taken up. Gandhamardan Bauxite project was also sanctioned by the government in 1982. The project is likely to be ready in 1985-86 for commencing bauxite mining operations.

CAPITAL : Authorised : Rs. 2,00,00,00,000 in 20,00,000 Equity shares of Rs. 1,000 each. **Issued, Subscribed and Paid-up :** Rs. 1,77,26,40,000 in 17,72,640 Equity shares of Rs. 1000 each fully paid-up. (Of the above shares 55,592 Equity shares were issued as fully paid-up for consideration other than cash for expenditure incurred by Government of India and interest on unsecured loans.)

Date of Accounts : 31st March.

BHARAT MINING CORPORATION LTD.

FOUNDED in 1944 at CALCUTTA. **Directors :** B. P. Jain, R. P. Jain, S. P. Jain, D. Bir Bakashi and R. K. Goel. **Registered Office :** 91, Stephen House, Room No. 91 (5th Floor) 4, B. B. D. Bagh East, Calcutta-700 001. Telephones 23-3253. Telegrams : 'BHAMICOR'. **Auditors :** Messrs. A. K. Kirkar & Co.

Objects and Activities : A mineral mining and fire bricks manufacturing company.

CAPITAL : Authorised : Rs. 50,00,000. in 10,000—6 per cent (tax-free) Cumulative Preference shares of Rs. 100 each, 3,50,000 Ordinary shares of Rs. 10 each and 1,00,000 Deferred shares of Rs. 5 each. **Subscribed :** Rs. 40,32,575 divided into 3,820—6 per cent (tax-free) Cumulative Preference shares of Rs. 100 each fully called-up and 3,64,745 Ordinary shares of Rs. 10 each fully called-up. *Add* : Forfeited shares (amount paid-up) Rs. 3,125.

Date of Accounts : 31st March. **Registration Fee :** *Nil*. **Fee for Split-up** or **New Certificate :** Rs. 2 per certificate.

BIKANER GYPSUMS LTD.

REGISTERED in 1947 at BIKANER. **Directors :** Jaikumar Karnani, Thakur Jaswant Singh, M. Mukherji, D. K. Saxena, M. L. Sethi, Motichand Khajanchi, M. L. Bose and A. C. Dutta (*Ex-Officio*). **Registered Office :** Sadul Club Bldgs., Bikaner, (Rajasthan). Telephone : 16, 'Bikaner', 22-6040, Calcutta-25854, Delhi. Telegrams : 'BIGYPSUMS'. **Auditors :** M/s. D. P. Chatterjee & Co.

Objects and Activities : The company carries on the business of mining and sale of Gypsum and Selenite.

CAPITAL : Authorised : Rs. 50,00,000 in 10,000-6% Redeemable Cumulative (tax-free) Preference shares of Rs. 100 each and 4,00,000 Ordinary shares of Rs. 10 each. **Issued and Subscribed :** Rs. 10,00,000 in 1,00,000 Ordinary shares of Rs. 10 each fully called-up.

Date of Accounts : 31st March. **Registration Fee :** Rs. 2 per transfer.

BISRA STONE LIME CO. LTD.

REGISTERED in 1910. **Directors :** J. N. Mallik, H. P. Bodhanwalla, A. K. Bose, S. S. Mukherjee, M. M. Dutta and J. G. Kumaramangalam. **General Manager :** A. K. Mital. **Secretary :** K. K. Bahri. **Registered Office :** Chartered Bank Buildings, Calcutta-700 001. **Auditors :** Messrs. Lovelock & Lewes.

Objects and Activities : Holds mining lease for quarrying limestone and dolomite for about 6,849 acres at Larvjiberna, Rourkela and Birmitrapur on South Eastern Railway, in the Sundargarh district of Orissa and work limestone and dolomite deposits therein. The company is the largest supplier of fluxstone to the steel works in Orissa, Bihar and West Bengal.

CAPITAL : Authorised : Rs. 50,00,000 in 5,00,000-Ordinary shares of Rs. 10 each. **Issued and Subscribed :** Rs. 50,00,000 in 5,00,000 Ordinary shares of Rs. 10 each fully paid-up. (Of the above 35,000 Ordinary shares are allotted as fully paid-up pursuant to a contract without payment being received in cash and 4,50,000 Ordinary shares have been allotted as fully paid-up by way of Bonus shares by capitalisation of General Reserve.)

Date of Accounts : 31st March. **Renewal Sub-division and Consolidation Fee :** Re. 1 per scrip.

CHITRADURGA COPPER CO. LTD.

INCORPORATED in 1966. **Directors :** M. Krishnamurthy, I.A.S., (*Chairman*), B. Ramachandraraj Urs (*Managing Director*), C. Gopala Reddy, I.A.S., Chiranjeev Singh, I.A.S., K. M. Koti, I.A.S., B. L. Sridhar, I.A.S., S. C. Mahanthi, D. Venkatakrishnan (IDBI *Nominee*), J. D. Teneja (IFCI *Nominee*), R. H. Sawkr (*Deputy Managing Director*). **Secretary :** Vijayakrishna, K. T. **Registered Office :** 16/1, Ali Asker Road, Bangalore-560 052, Karnataka State. Telephones : 73053 and 73054, 24369. **Auditors :** Messrs. Sarvotham & Co.

Objects and Activities : Extraction of copper ore and processing it into copper concentrate. *Licensed/Installed Capacity* : 6,000 M.T.

The mines are situated at Ingaldhal village, Chitradurga district. It is a government company and the shares are held by the government of Karnataka and other state government companies. The state government has recently taken a decision to merge the company with The Hutti Gold Mines Co. Ltd.

CAPITAL : Authorised : Rs. 3,00,00,000 in 3,00,000 Equity shares of Rs. 100 each. **Paid-up :** Rs. 1,95,00,000 in 1,95,000 Equity shares of Rs. 100 each.

Date of Accounts : 31st March.

INDIAN OIL CORPORATION LTD.

REGISTERED in 1959 at BOMBAY. **Directors :** A. J. A. Tauro (*Chalrman*), T. K. Sinha, M. S. Rana (*Director-Marketing*), Bimal Kapoor (*Director Personnel*), Nitin Desai, R. Vasudevan, **Secretary :** D. B. Puri. **Registered Office :** 254-C, Dr. Annie Besant Road, Prabhadevi, Bombay-400025. Telex : 011-2656, 4102. Telegrams: 'INDANOIL'. **Joint Auditors:** Messrs. Ford, Rhodes, Parks & Co. and Messrs. Ray and Ray.

Objects and Activities : The company's products include, formula products, lubricants and greases, other petroleum products, crude oil, base oil and additives.

The main processing unit of the Refinery at Mathura i.e. crude distillation unit was put on trial production in 1982 and three secondary processing units have also been subsequently commissioned. Efforts are being made to convert a number of Power-houses in and around Mathura from furnace oil to LSHS.

The fluid catalytic cracking unit which is being set up at Gujarat Refinery to upgrade LSHS by secondary processing into more valuable products like LPG, motor spirit, HSD, LDO etc. is expected to be mechanically completed and commissioned shortly.

Installation of an additional coking unit at Barauni Refinery has been approved by the government. The project is expected to be completed shortly. The proposal to set up a paraffin wax plant with a capacity of 50,000 tpa at Barauni Refinery is also under consideration.

The proposal to expand the capacity of Haldia Refinery by 3 mtpa is under consideration.

The 'NUTAN' stoves are marketed by the corporation. The Research and Development centre of the corporation is set up at Faridabad. It consists of Product Development Laboratories, Analytical Laboratory, Engine and Rig Testing Laboratories, Photography Instrumentation Laboratory and Test Vehicles Laboratory.

The Lubricant formulations cover a wide range of products as automotive engine oils, marine oils, railroad oils, industrial oils and greases, metal working fluids, rust preventives and specialities. These lubricants are sold under the brand name of 'SERVO'.

The Mathura-Delhi section of the pipe line was commissioned in 1982 and the Delhi-Ambala section has been also commissioned. Project for augmentation of docklines to optimise the tanker pipeline at Haldia and a new dockline at Madras are in progress and are expected to be completed shortly. LPG Marketing project envisages four new bottling plants at Bangalore, Jullundur, Allahabad and Salem. Bangalore plant has already been commissioned in 1982. The other plants are likely to be completed shortly.

The right, title and interest and the interest and the liabilities of The Burmah Oil Company (India Trading) Limited and Assam Oil Company Limited have been vested in the Corporation with effect from 14th October 1981.

Messrs. Indian Oil Blending Limited and Messrs. India Trading (Holdings) Private Ltd. are wholly owned subsidiaries of the Corporation.

CAPITAL : Authorised : Rs. 1,50,00,00,000 in 15,00,000 Equity shares of Rs. 1000 each. **Issued and Subscribed :** Rs. 1,23,26,58,000 in 12,32,658 Equity shares of Rs. 1000 each fully paid-up. (Of the above 3,76,497 shares and 1,00,000 shares were allotted as fully paid pursuant to the Petroleum Companies amalgamation order, 1964 and the Gujarat Refinery Project undertaking (transfer) (amendment) order 1965 respectively, without payment being received in cash and 4,10,886 shares are allotted as fully paid-up Bonus shares by capitalisation of Reserve during the year.)

Date of Accounts : 31st March.

Dividend declared : 1983—14 per cent, 1982—14 per cent, 1981—14 per cent, 1980—12 per cent.

INDIAN RARE EARTHS LTD.

REGISTERED in 1950. **Directors :** M. A. Hadi (*Chairman and Managing Director*), J. G. Kanga, R. P. Mungla, Dr. A. Besant C. Raj, Prof. R. N. Sukheswala. V. S. Venugopala Rao. **Secretary :** R. K. Ramanathan. **Registered Office :** Pil Court, 6th Floor, 111 Maharshi Karve Marg Bombay-400 020. **Auditors :** Messrs. V. Sankar Aiyar & Co.

Objects and Activities : The company operates three major units (1) The Mineral Dvision at Quilon (2) The Rare Earths Division at Alwaye and (3) Orissa Sand Complex (OSCOM) at Chatrapur. It also operates the thorium plant of the Government at Trombay.

The Minerals division has its headquarters at Quilon, Kerala. It has its sand operation plants at Manavalakurichi in Tamil Nadu and at Chavari near Quilon. This unit offers illmenite, zircon, rutil[illegible] garnet etc.

The Rare Earth division has its headquarters at Alwaye, Kerala commissioned in 1952. The factory has an installed capacity for processing 4,200 tonnes of monazite per annum. The main products are rare earths chloride. cerium oxide trisodium phosphate, cerium nitrate etc.

Oscom project has been set up in Cheteapur, in Ganjam Dist. of Orissa for the separation and processing of rich mineral sand. The company also operates the Thorium plant of the Govt. of India at Trombay where thorium compounds (thorium nitrate, thorium oxide, thorium hydrocarbonate) are manufactured from thorium hydroxide obtained from the Alwaye plant.

The Preconcentrator project at Manavalakurichi has been commissioned. This facility is expected to add substantially to the availability of monazite,

This is a Government. of India company under the administration of the Department of Atomic Energy.

WEST BENGAL MINERAL DEVELOPMENT & TRADING CORPN. LTD.

INCORPORATED in 1973. **Directors :** P. K. Paul (*Chairman*). A. Chaudhuri (*Managing Director*), U. Chatterji, S. K. Sarkar, A. K. Bhaduri, H. B. Ghose, K. K. Sengupta, R. N. Ghose, Dr. M. K. Roy Choudhury. **Secretary :** S. P. Sarker. **Registered Office :** 13, Nellie Sengupta Sarani, 2nd Floor, Calcutta-700 087. Telephone : 24-7376, 24-3819 and 24-8563. Telegrams : 'WEBMINDEV'. **Auditors :** Messrs. Bagchi & Co.

Objects and Activities : Mining and trading in minerals, i.e. rock phosphate as direct application, fertilizers, fire clay, quartz, feldspar, granite, basalt Ltone, China clay etc.

The factory is at Purulia, Birbhum. A new company named North Bengal Dolomite Limited has been formed in collaboration with Steel Authority of India Limited

CAPITAL : Authorised : Rs. 2,00,00,000 in 20,000 Equity shares of Rs. 1000 each. **Paid-up :** Rs. 1,93,00,000 in 19,300 Equity shares of Rs. 1000 each.

Date of Accounts : 31st March.

IPCON

Industrial Projects and Consultants Limited

Prospective entrepreneurs prosper with our services

Industrial Projects and Consultants Limited, promoted by Kotharis of Madras, a dynamic Industrial House, which, in collaboration with renowned foreign organisations, has set up a number of units to manufacture textiles, fertilizers, caustic soda, chlorine, food products, etc., a background which has enabled IPCON to function with uncommon expertise.

IPCON offers comprehensive range of consultancy services

- ∗ **Feasibility & Market Reports**
- ∗ **Assistance for clearance from State/Centre for projects**
- ∗ **Assistance for loan sanction from Banks/Institutions**
- ∗ **Design & Detailed Engineering**
- ∗ **Procurement/Inspection**
- ∗ **Erection & Commissioning.**

With its unique blend of discipline and personnel, IPCON is best-equipped to serve a varied clientele.

SUMMER '84

POLYRICH POLYWORTH POLYCLASS

Vimal weaves a cool theme into its Summer '84 collection.

Physical and psychological comfort.

ONLY VIMAL
India's most modern textile plant

Mudra/RTI/1503/A

International film star, Kabir Bedi

Vimal's Polyrich, Polyworth Suitings and Polyclass Shirtings, bring you the best of both worlds in comfort and elegance.

Made from international quality yarns specially selected and engineered to absorb and transport sweat to the surface at a faster rate. To enable your body breathe freely and give you a cool, uncreased look even on the hottest summer day.

These fabrics with excellent fall, feel and drape are ideal for a season in the sun.

You have a wide choice of colours. Take your pick from Office Grey, Business Blue, Beige, Offwhite, White, Airforce Blue, Olive, Wine, Khaki, Military Green.

VIMAL®
A RELIANCE PRODUCT

Polyrich & Polyworth Suitings

Polyclass Shirtings

MISCELLANEOUS

CERAMICS

THE Ceramic Industry is large and variegated. It includes manufacture of all kinds of non-metallic, inorganic mineral products with the application of heat. Clayware, glassware, enamels and refractories are included under traditional ceramics while modern ceramics includes high-tension insulators, super-refractories, electronic ceramics such as micro-circuits, silicon cells, laser glass, ceramic fuel, optical communication fibres, synthetic quartz, crystals etc. India, has a broad-based traditional ceramic industry while the development of modern ceramics is still in its inception.

India is really fortunate to have all the raw materials needed for this industry. The main raw materials are China clay, ball clay, fire clay, quartz feldspar, marble, bauxite, gypsum, silica sand and wollastornite. The country has the technical competency to manufacture the machinery and equipment needed.

Refractories

The refractories play a vital role in core industries such as steel, aluminium, cement and fertilisers. The major consumer of refractories is the steel industry. Iron and Steel plants consume approximately 75 per cent of the total output of refractories. They are not only required for constructing steel furnaces, but also for their repair and maintenance, thus making them a permanent feature of a steel plant inventory.

The installed capacity of refractories has gone up from 13,50,000 tonnes in 1980-81 to 14,92,000 tonnes in 1982-83. The production of refractories has also shown a steady increase over the years. It was 7,50,000 tonnes in 1980-81 and 8,75,000 tonnes in 1982-83. The overall capacity utilisation has increased from 55.6 per cent in 1980-81 to 58.6 per cent in 1982-83.

Glazed Tiles

The Indian ceramic tiles industry is on the threshold of an exciting world of colours and variety. For the first time, the ceramic tiles (as distinct from the glazed tiles used in kitchen, bathroom and public places such as hospitals and railway platforms) are to be manufactured in the country. The extremely sophisticated nature of the technology involved in wall and flooring tiles manufacture had kept the Indian industry at bay till now. But this problem has been overcome, as the proposed units under this category will have foreign collaboration. The availability of raw material also poses no problem as good quality low-fusing clays are abundant in Tamil Nadu and Andhra Pradesh. The Andhra Pradesh Industrial Development Corporation in collaboration with an American firm has put up a unit in the joint sector near Tirupathi with an installed capacity of 12,000 tpa of wall and flooring tiles.

The Indian Ceramic flooring and tiles industry is struggling to meet the domestic demand which has been outpacing production for the last few years. The present demand for glazed tiles is around 65,000 tonnes. Against this the present installed capacity is no more than 62,000 tonnes, which is likely to go up to 1.19 lakh tonnes by 1987 in order to meet a projected demand of 1.11 lakh tonnes. The entire production of glazed tiles comes from six units in the organised sector located in Haryana, Thana, Bombay, Gujarat and New Delhi.

Electronic Ceramics

Ferites, capacitors and other electronic ceramics are being increasingly manufactured in the country. As the electronic industry is expanding rapidly, electronic ceramics has a good market potential.

The major problem affecting the growth of the ceramic industry is the prevalence of obsolete technology. Most ceramic units use the traditional down-drift firing kilns that require the most expensive quality of steam coal to generate the necessary amount of energy. Fuel efficiency in these units is as low as 2 to 3 per cent. The non-availability of steam coal and the existence of quota system for the supply of steam coal has resulted in low production and under-utilisation of capacity (nearly 40 per cent).

Changes in production technology together with a reviving economy are likely to shake up the production figures which had otherwise levelled off in the past few years. The demand for ceramic products is expected to go up by 50 per cent by 1990. With an expansive man-power base and traditional skill existing in the country, this industry has the capacity to make a major breakthrough in the international ceramic market, while bettering its domestic performance as well.

Cigarettes

There are presently 19 units in the Private Sector engaged in the manufacture of Cigarettes in the Country. The first Joint-sector Cigarette factory in India has been set up at Jammu, by the State owned Jammu & Kashmir Industrial Development Corporation and the Golden Tobacco Company. Besides these, Letters of Intent have also been issued to the State Industrial Development Corporation of Assam, Haryana, Kerala and Tamil Nadu. Each of these units will have a capacity of 4,500 million cigarette pieces per annum, except for the unit in Assam which will have a capacity of 3000 million pieces per annum.

The production of cigarettes has been steadily going up over the years. In 1948-49, the volume of cigarette production was around 16,800 million pieces and this had gone up to 96,000 million pieces by 1981-82. The export of Cigarettes has also risen from 1,179 thousand kgs. valued about Rs. 16 Million in 1972 to about 1,400 thousand kgs. worth about Rs. 36 million in 1982. The per capita consumption of cigarette in India is one of the lowest in the world which is 10 pieces per month as against 217 in the U.S.A. and 170 in Japan.

Tobacco is the main agricultural raw material from which cigarettes are manufactured. Next to China and the U.S.A., India is the third most important tobacco producing country in the world. Nearly 60 per cent of the raw tobacco produced in the country (5,25,000 tonnes in 1982) is exported while the rest is consumed by the domestic market for the manufacture of Cigarettes, Cigar, Cheroot, Beedi, Chewing tobacco and Snuff. The domestic consumption of cigarettes tobacco is about 88,000 tonnes while cigar and cheroot industries consume around 15,000 tonnes per annum of uncut tobacco.

Coir Industry

Of the total volume of 14,900 tonnes of coir entering the world annually, India accounts for 90 per cent of coir yarn, 63 per cent of coir manufactures and 95 per cent of coir cordages and ropes. The coir industry, which forms the main plank of the economy of the coastal areas, is one of the traditional industries in South India. Among the states, Kerala is the largest producer of coir. The State also tops in the production of white fibre, coir yarn, coir mats and mattings which are carried on through handlooms.

Tamil Nadu is the second largest producer of coir. The State has made a major headway in the production of brown fibre from unrettled tusks. A fully automated unit with 38 power looms has been set up in Kanyakumari, to produce coir mattings. In Karnataka a number of units are in operation for the mechanical extraction of fibre, besides two rubberised coir producing units. A few coir producing units are also situated in other coconut-producing States such as Andhra Pradesh, Maharashtra, Goa, West Bengal, Gujarat and Orissa.

A wide range of coir products of different types in exquisite designs and patterns are being manufactured and exported by the Indian Coir Industry. The export of coir and coir products had fallen steeply over the years ; as against 78,000 tonnes in 1961, the export of coir products during 1981-82 amounted to 30,079 tonnes and in 1982-83 it was 30,133 tonnes. This fall in export was due to the stiff competition from synthetic products which are slowly replacing coir products, especially in the packaging industry. Western Europe is the largest importer of Indian coir products accounting for 60 per cent of its total exports, followed by America whose share has increased from 8 per cent to 23 per cent over the last six years. The trend of export of coir and coir products from India during 1979-80 and 1980-81 is illustrated in the following table :

TABLE 1

Export of Coir and Coir Products

Commodity	1979-80		1980-81	
	Qty. (in tonnes)	Value (in Rs. Millions)	Qty. (in tonnes)	Value (In Rs. Millions)
Coir Fibre ..	36	0.12	164	5.72
Coir Yarn ..	25,873	155.55	13,486	873.06
Coir Mats ..	11,715	119.13	7,403	823.30
Coir matting rugs and carpets ..	9,276	96.28	7,330	843.25
Coir rope ..	81	0.43	79	4.72
Curled Coir ..	240	0.55	148	4.42
Rubberised coir goods ..	2	0.05	1	0.18
Total ..	47,223	372.11	28,611	2554.65

Fisheries

Fish being relatively cheaper and having superior nutritional properties, could easily become a key element in Man's fight against hunger and malnutrition the world over. Being endowed with rich marine resources, there is a vast potential for fishery development in India and as such the country should accord high priority to this industry so as to increase the nutritional level of proteins in the Indian diet and also to earn the much needed foreign exchange.

Fishery resources of India are either inland or marine. The fresh water resources comprise riverine systems, reservoirs, ponds, tanks etc Whereas brackish water resources comprise estuaries, lakes and backwaters ; the inland water resources have been estimated at 29,000 km. of rivers, 3 million hectares of reservoirs, 1.5 million hectares of tanks and ponds and 1.4 million hectares of brackish water swamps. With a coastline measuring 5650 km. and the vast Indian Ocean surrounding three sides of the country, the marine resource is one of the richest wealths, India is blessed with. The estimates of the potential catches of the Indian Ocean varies from 11 million to 60 million tonnes, apart from mesopelagic fish which may have an annual potential yield of billion tonnes. Currently production of fish from inland sources is around 1 million tonnes and from marine sources it is about 2.5 million tonnes.

The importance of India as a fishing nation can be judged from the fact that nearly 45 per cent of the marine yield from the Indian Ocean is landed in India. Bombay-duck and ribbon fish come almost exclusively from India. The landings in the Indian Ocean of oil sardine, mackerel, pomfret, prawns, catfish and croakers come predominently from Indian waters. Several distinct types of fishing crafts and implements have been evolved in the country so as to suit the local environmental and biological requirements.

The chief means of fishing in India are: (a non-mechanised boats; (b) mechanised crafts and (c) larger fishing trawlers. The fleet of non-mechanised boats is still of considerable importance as about 67 per cent of the fish production is contributed by this sector, while the mechanised and deep-sea fishing sector contribute about 32 per cent and 1 per cent respectively. At present, the country has a little over 1,20,000 indigenous non-mechanised crafts, 18,200 mechanised boats and 114 commercial deep sea fishing vessels consisting of 68 vessels fully-owned by Indian companies and 46 vessels on charter, which is inadequate to cover the 2 million Sq. km. of waterspread that falls within the 200 mile exclusive economic zone (EEZ) from the coastline. The Table below gives the targets of fish production and some selected input programmes as envisaged under the Sixth Five-Year Plan (1980-85):

TABLE 2

Targets of fish production and some selected inputs programmes:

Fish Production Programme	Unit	Base Level 1979-80	Target 1984-85
(1)	(2)	(3)	(4)
Fish Production:			
Inland ..	lakh tonnes	8.55*	13.00
Marine ..	lakh tonnes	14.81*	22.00
Total ..	lakh tonnes	23.36*	35.00
Mechanised Boats ..	Nos.	16,100	19,000
Large deep sea fishing vessels ..	Nos.	105	350
Fry ..	Million	1,048	2.200
Nursery Area ..	Hectare	1,454	2,800

* Trend line estimates based on 1967-68 to 1978-79 data.

Development of fisheries requires provision of a wide-spectrum, basic infrastructural facilities which are unfortunately utterly lacking in India. These facilities comprise of harbours for berth fuel, water, ice provisions, shipways, workshops, auction halls, cold storages and transportation, besides the right type of vessels and appliancss including the R & D efforts. While the marine products industry is heavily export oriented, domestic market is comparatively under-developed where it is confined mostly to coastal towns due to meagre cold storage capacity and inadequate transportation.

Indian fishing industry has emerged as one of the top ranking foreign exchange earners of the nation. During 1982-83 there was a substantial step-up in the exports of fish and fish products, as these registered a rise of 28.3 per cent in quantity and 24.7 per cent in earnings at a total of 9,48,000 tonnes valued at Rs. 349.5 crores as compared to 7,39,000 tonnes valued at Rs. 280.3 crores in 1981-82. The bulk of the country's export of marine products mainly consisting of frozen shrimps, are shipped to Japan and the U.S.A. The Sixth Plan has envisaged an increase in the number of deep sea vessels to 350 and marine exports to Rs. 600 crores. There is a good scope for substantial expansion in the export of the marine products to around Rs. 1000 crores a year, which in turn, would depend on the adequate production development, infrastructural storage and transport facilities duly backed by quality.

Through improvement and extension of relevant technology of production, processing and marketing both in regard to inland and marine fisheries, the fishing industry could ensure availability of fish for local consumption at reasonable prices and also promote export of marine products by diversifying the sectoral composition and exploring new international markets.

Gems and Jewellery

The Gems and Jewellery of India have had a prestigious past. The delicate and dazzling art of cutting and polishing diamonds and other precious stones and the creation of exquisite gold jewellery studded with precious stones and diamonds, using exotic oriental designs and Moghul patterns has been India's forte for centuries.

Some of the best known and rare diamonds such as the Kohinoor, the Orliff, the Great Moghul, Savey Hope, Shab, Florentine, Nassak, Regent etc. were India's gifts to the dazzling world of exquisite gems and jewellery.

Gems and Jewellery are the second largest export-earning items for India, next only to engineering goods. With a view to promoting the exports of gems aud jewellery including pearls, precious and semi-precious stones, diamonds, synthetic stones, imitation and non-gold jewellery, the Gem and Jewellery Export Promotion Council was formed in 1966. The Council's role is that of an all India apex body representing over 2,600 exporters of gem and jewellery items in India. Ever since the inception of this Council the exports has registered a phenomenal increase from a meagre Rs. 22 crores in 1966-67 to a record of Rs. 1015 crores in 1982-83. The following table traces the growth of exports of gems and jewellery industry since 1966-67, the year of inception of the Gems and Jewellery Export Promotion Council.

TABLE 3

Growth in India's Exports of Gems and Jewellery

(Value in Rs. lakhs)

The major markets for Indian gems and jewellery are the U.S.A, Belgium, Hong Kong, Japan, Switzerland, Singapore, France, the U.K., the U.A.E., and Kuwait. Of them the U.S.A., Belgium and Hong Kong jointly account for more than 80 per cent of India's total exports of gems and jewellery. The countries such as Kuwait, the U.A.E., the U.K. etc. are major markets for good jewellery. The countries to which India's exports of gems and jewellery are fast looking up are Japan, Switzerland, France, Kuwait, and the U.A.E., which till recently were only marginal buyers from India. The following table gives the trend of exports of gems and jewellery to selected countries.

TABLE 4

Exports of Gems and Jewellery to Selected Countries

(Value in Rs. lakhs)

Diamonds

The Diamond Industry in India, which made a humble beginning in the late 50's, has taken deep roots within the last two decades. The Industry provides gainful employment to an estimated 3,50,000 persons, working in about 30,000 small units spread all over the country. The industry is mainly concentrated in Maharashtra, Gujarat Uttar Pradesh, Rajasthan, Tamil Nadu, West Bengal and Kerala. More than 80 per cent of the Diamond cutting is done in Gujarat, with Bombay as the trading centre. India is a World leader in the manufacture and export of diamonds and this has been achieved despite the country's total dependence on imported raw material. The industry imports around 20 to 25 million carats of rough diamonds out of the total annual world production of 50 million carats.

During the early Seventies, the Indian diamond industry witnessed an unprecedented growth due to several favourable factors. It was India's entry into the field of diamond processing that brought diamonds within the reach of an increasingly wider segment of people. The spread of affluence led to a growing demand for low priced small size diamonds which was India's forte. The total value of India's export of processed diamonds exceeded that of the traditional leaders in the field namely, Israel and Belgium. These two countries have suffered a severe setback during the last few years as a result of their specialisation in large-sized diamonds, the market for which has collapsed as a result of prevailing recessionary conditions. Indian diamond is today the single largest commodity of export from the country and it is the only item in the country's export list which commands a significant share (about 20 per cent) of the world trade.

The diamond industry has been able to achieve a tremendous growth rate on the export front, without any governmental support ; the export has gone up from Rs. 11 crores in 1966-67 to Rs. 913 crores in 1982-83, amounting to about 90 per cent of the country's Gems and Jewellery exports.

India supplies presently about 4.6 million carats or about 150 million pieces of diamonds to the world market. The Indian industry, by and large, has been confined to processing of standard round brilliant cut with 58 facets or the bridged version of it generally practised on very small diamonds with 18 facets.

In India, diamond cutting and polishing is still done by traditional craftsmen with conventional tools that restrict the quantity as well as the quality of the product. As the industry is facing severe competition from Israel and Belgium where the workmen cut and polish diamonds in a scientific way, it is imperative for the survival of the Indian Industry, to change from traditional methods to modern sophisticated techniques. India could capture a major market if the craftsmen are exposed to the new technology and sophisticated production methods.

As the market for small size diamonds in which India so far had a monopoly, appears to have reached a stage of saturation India will have to increase its share of exports through major changes in the product-mix in order to sustain its position as the leading supplier ; by improving productivity, quality and yield through technological innovation and better interaction between the exporters and craftsmen, the country's export target of Rs. 4,500 crores by 1990, may well be within the reach.

Precious and Semi-precious Stones

Precious and semi-precious stones constitute the third largest item of export among gems and jewellery exported from India, amounting to Rs. 45 crores (1982-83). In India, the processing of semi-precious stones is concentrated in certain specialised centres — precious and semi-precious stones in Jaipur and Cambay, pearls mostly in Bomby and synthetic stones in Tiruchirapally. Due to very negligible production of rough coloured stones, the industry is permitted to import roughs for export production. Import-duty on the rough is waived by Government notification issued from time to time. The roughs required by the Industry are mainly imported from Brazil, Colombia, Tanzania, Thailand etc. The major markets for Indian polished precious/semi-precious stones are West Germany, France, Hong Kong, Thailand, the U.S.A., Japan and Switzerland. As the country has enormous gemstone wealth which has not been fully exploited so far, there is great potential for growth for this industry. An encouraging Government Policy can help the country gain a better share of the world export of precious and semi-precious stones. The Industry is all set to attain the target of Rs. 200 crores worth of export by 1989-90.

Jewellery

India today occupies a unique position in the world of jewellery making. Over one million strong workforce of skilled goldsmiths and jewellers work on precious metals primarily for the local markets using primitive tools and traditional designs. Indian manufacturers of studded jewellery have a vantage position in as much as they have access to direct source of procurement as far as the raw material for making of sophisticated jewellery is concerned. Moreover, gold for export purpose is also available to Indian manufacturers at international prices.

The millions of carats of diamonds and other gems that India exports every year ends up in jewellery ; thus the value-added part on the diamonds cut and polished in India is being earned by countries such as Hongkong, Italy and West Germany. This added-value content in studded jewellery is about 32 to 40 per cent depending on the metal content. Hence, in order to augment the benefits, studded jewellery has been included in the list of commodities selected under 100 per cent export oriented commodities. The trend in the export of gold jewellery is given in the table below :

TABLE 5

India's Export of Gold Jewellery

(Rs. in lakhs)

Year		Exports of Gold Jewellery
1974-75	..	77
1975-76	..	90
1976-77	..	237
1977-78	..	672
1978-79	..	540
1979-80	..	1,693
1980-81	..	1,460
1981-82	..	4,053
1982-83	..	5,093

Prior to 1978-79, the export of gold jewellery was very low due to lack of clear direction. The year 1979-80, and the time upto October 1980, refer to the period when the Gold Replenishment Scheme was in operation. From October 1980, the export of gold jewellery has been entrusted to the Handicrafts and Handlooms Exports Corporation of India Ltd., and the growth has been phenomenal since then. The export of gold jewellery has gone up from Rs. 7.7. crores in 1974-75 to around Rs. 51 crores in 1982-83.

Glass Industry

Legend ascribes invention of glass to the phoenicians. At the beginning of the Christian era, glass making was highly developed in Rome for table services, drinking cups, windows and even as wall coverings. Glass is an amazing substance with unique properties that are not found in any other material. In its virgin form it has the strength of steel. Today, glass is so much a part of our daily life that we cannot imagine living without it.

In India, the history of glass making goes back to the 16th centrury, though glass making on systematic lines started only in 1870. It attained the status of an industry after having received an impetus from foreign collaboration in the early post-independence years. Since then, this industry has traversed a long path and today, with a total investment of over Rs. 100 crores, it has proved itself, technologically and otherwise, capable of manufacturing products that could match the the best in the world.

There are around 34 units manufacturing bottles and other glass containers with an annual installed capacity of around 4.63 lakh tonnes. Two units manufacture fibre glasses with a licensed capacity of 1200 tonnes per annum. There are 8 units in the field of sheet glass manufacturing, with an installed capacity of 316 lakh sq. metres. The production of glass has shown a marked expansion over the years. The trend in glass production may be seen from Table 6.

TABLE 6

Glass Production in India

Year		Sheet Glass (in lakh sq. metres)	Glass bottles, pressed wares and other glass containers (in '000 tonnes)
1975	..	143.0	2.13
1976	..	208.5	2.29
1977	..	224.6	2.51
1978	..	220.0	2.74
1979	..	250.5	3.15
1980	..	270.0	3.46

Source : Capital, February 1983.

During 1980-81, over 7 lakh tonnes of glassware was produced. Container and hollow-ware amounted to 5 lakh tonnes, sheet glass to 23 million sq. mtrs. and figured glasswares touched a production level of around 19 million sq. mtrs. The production of vacuum flasks, comprising 4 large and 6 small manufacturers was 3 million in number. Scientific and laboratory glassware amounted to 900 tonnes. Apart from these, a large quantity of glass lamps, shells, bangles and beads are also being manufactured in the country. The glass industry is anticipated to score an annual growth rate of about 15 per cent between 1985 and 1990. Besides meeting the ever-increasing domestic demand, the industry has intensified its export potentiality as well. During 1981-82, the total export was in the order of about Rs. 23.8 crores, which is likely to go upto Rs. 81 crores by 1984-85. The export performance of glasswares may be observed from the following Table :

TABLE 7

Export of Glassware

(Rs. in lakhs)

Items		1970-71	1980-81	1981-82
Sheet Glass	..	17.00	131.00	150.00
Safety Glass	..	8.00	23.00	30.00
Scientific Glassware	..	14.00	47.00	35.00
Vacuum Flasks & Refills	..	44.00	317.00	400.00
Glass bottles & vials	..	48.00	450.00	600.00
Figured & Wired Glass	..	25.00	580.00	650.00
Other Glassware	..	60.00	422.00	515.00

Source : Capital, February 1983.

High production cost has been marring much of the hidden potentialities of this industry. Major constraints such as very high rate of excise duty on all glass products, frequent power cuts, high cost of furnace oil, heavy duty on inputs such as masonite and above all the levy of negligible excise duty on plastic and tin containers which are close substitutes have resulted in the slow growth of this industry. Moreover, the substandard quality of raw materials supplied upsets the quality of the glass produced. As the glass furnace uses fuel and power for maintaining the furnace temperature irrespective of the production and, due to power cut, only 57 per cent of machine operation is possible, which results in 43 per cent of the fuel being wasted. Since fuel is very expensive, this wastage causes a substantial loss to the industry. Glass-making is a continuous process industry where all units have to work throughout the year without any interruption. The industry works on over 90 per cent load factor and does not create any peak in demand on the electrical system. Moreover, the industry does not get any benefits such as rebate on power charges, but is being penalised with unduly disproportionate cuts which is causing a crippling blow to this industry.

Leather and Leather Goods

The leather footwear industry, largely confined to the small-scale sector, is an important labour intensive industry. A considerable part of the demand for leather footwear is being met from cottage and small scale sectors which account for nearly 90 per cent of the total footwear production. During 1980, the total production of leather was 183 million pairs as against the installed capacity of 230 million pairs. The footwear industry is all the more important as it has a tremendous capacity to earn the much needed foreign exchange. During 1979-80, the export of footwear was about Rs. 48 crores but it dropped to Rs. 38 crores in 1980-81 due to recessionary trends in world market. The Government's Policy on leather industry aims at maximising the foreign exchange earnings by value-added exports through quota restrictions on semi-finished leather. This has resulted in the increasing share of finished leather and leather goods, amounting to nearly Rs. 235 crores out of a total export earnings of Rs. 400 in 1982-83. The export of leather and leather goods (including footwear) has been stagnant during the last few years. In 1979-80, exports amounted to a record level of Rs. 520 crores, but in 1980-81 it declined to Rs. 378 crores on account of recession in world leather industry. However, the improvement registered in 1981-82 at Rs. 415 crores was not maintained in 1982-83, which declined to Rs. 400 crores.

The Indian leather industry suffers from a low utilisation of installed capacity. Moreover, this is one single industry where, barring a few large factories here and there, its products continue to be manufactured with very little use of modern technology. The high incidence of import duty on wattle extract and other tanning materials, consumables, spares and machinery has come in the way of modernisation and mechanisation, especially in the small sector. A strong point of this industry is that it is rich in the matter of its principal raw material, namely, hides and skins, as India has the world's largest cattle population (180 million heads of cattle and 61 million buffaloes). This necessitates greater attention towards animal husbandry measures, in order to ensure a steady increase in the supply of quality hides and skins, needed for the manufacture of value-added items such as leather, leather footwear, shoe uppers, leather garments etc.

Match Industry

The first Indian venture in Match Industry was as early as in 1894, when Amrit Match Factory at Bilaspur and Gujarat Match Factory at Ahmedabad were established. The early Indian match production was dependent entirely on foreign machinery, imported technology and raw materials. Sweden, which was enjoying a world monopoly at that time, was meeting almost the entire demand for matches in the country. It established the Western India Match Company (WIMCO) in 1923 and within the next four years, four more units were added. At that time, aided by Japanese efforts, manufacture of matches in the small scale and non-mechanised sector was also developing fast, at first in Bengal and then in South India, where it was confined to three centres in Tamil Nadu, namely Kovilpatti, Sattur and Sivakasi.

With its vast potential for rural employnent, the industry's development in the cottage sector was encouraged at the instance of Gandhiji, through the All India Village Industries Association and hence the Government of India took a keen interest in its development. This development work received further impetus with the setting up of the All India Khadi and village Industries Board in 1953 and the Khadi and Village Industries Commission (KVIC) in 1957.

India has now become completely self-sufficient in respect of matches. This industry is broadly classified into two sectors viz. the mechanised and the handmade sectors. The handmade sector is further sub-divided into the Small Scale Sector and the Cottage Sector. The mechanised sector (WIMCO) uses power for its operation with a production capacity not exceeding 5000 million boxes per annum, while the small scale units do not use power but have an annual production exceeding 75 million sticks or 10415 gross per unit and the cottage scale units have a production capacity below 75 milion sticks per annum per unit. Today there are over 5,200 cottage units contributing about 10 per cent of the country's total annual production of about Rs. 100 crores. About 65 per cent of the cottage sector units are situated in Tamil Nadu, 18 per cent in Kerala about 7 per cent in Andhra Pradesh and the balance spread over many states.

The production of safety matches is projected to grow at the rate of 6 per cent per annum and reach the level of 23,905 million boxes by 1986, the 'tiny sector' having a dominant share in this.

On the export front, the Match Industry's contribution is very meagre despite expanding production and sizeable export market potential. Saudi Arabia, Kuwait, Qatar, Afghanistan, Oman and Dubai are the regular importers from India but their quantum of import is small. Taking advantage of the geographical proximity, price competitiveness and proven market acceptance on the one hand and technology capability, labour cheapness, large employment potential on the other, India should strive to tap the export market potential available in the nearby Gulf Countries. Some of the problems that are obstructing expansion of exports are the shortage of raw materials such as potassium chlorate, match wood etc. and uncertainty about the availability of shipping space, as the safety matches are classified as hazardous materials. The cash assistance of 10 per cent available at present is also considered inadequate to induce larger exports, as there is a ready and lucrative domestic demand.

The production of safety matches in the mechanised and handmade sector, between the year 1953-54 and 1981-82 is given in the following table.

TABLE 8

Production of Safety Matches

(Million Gross boxes of 50 sticks each)

Year		Mechanised	Handmade
1953-54	..	24.6	10.8
1959-60	..	29.6	14.4

Processed Foods Industry

The Processed Foods Industry plays an important role in augmenting and supplying protein-rich food items at affordable prices, for the masses. Processed Foods Industry includes biscuits, bakery products, confectionery, meat and fish processing, canning and processing of fruits and vegetables, dairy products including baby foods, starch and malt-based products etc. This industry has a high employment potential at lower level of investments. It employs about 17 per cent of the total organised workforce and with 19 per cent of the total number of factories in the country, it produces 16 per cent of the total industrial output. The production trend in selected items in the organised sector as shown in Table 9 provides some indication of the performance of the processed foods industry over the years.

TABLE 9

Bakery Products

The foremost among the processed foods industry is the bakery industry with an approximate annual turnover of Rs. 700 crores. Biscuits alone account for a third of the baked products. In the organised sector (DGDTD Units), there are 33 biscuit units with an installed capacity of 1.47 lakh tonnes and 1.32 lakh tonnes respectively. The unorganised sector consists of 22 large bakery units, 383 medium, 3728 small and 49,767 household or family units. Most of the growth in this industry is expected to come from small units.

Processed and Preserved Fruits and Vegetables

Fruits and vegetables deteriorate rapidly and efforts to find a more satisfactory method of preserving vegetables and fruits so as to maintain their nutritive value were made in Europe towards the end of the Eighteenth century. Nicholas Appert is generally considered as the inventor of canning process. While Appert had shown the way to preserve food in glass containers, Peter Durant in England obtained a patent in 1810 to use tinned iron containers for preserving food. Half a century later, Louis Pasteur discovered Microbes and found the real cause of decomposition of food. Food preservation industries developed rapidly thereafter through improved processes of canning and bottling. Canning of fruits and vegetables has now become an important industry in India and the units engaged in the industry are generally run on scientific lines with requisite machinery and equipment.

Beer

There are totally 29 breweries in India with an installed capacity of about 1.8 million kilolitres, spread throughout the country. Production of beer in India is around 1.7 lakh kilolitres, which is hardly 0.2 per cent of the world output of 960 lakh kilolitres.

Soft Drinks

Soft drinks include all types of non-alcoholic liquid and powder beverages containing syrup, essences or fruit concentrate that are mixed with water or carbonated water. It is one of the largest food industries in the world today. The most popular soft drinks sold throughout the world today are cola, orange, rootbeer, ginger ale, lemon and lime.

The soft drinks output in India has more than doubled between 1975 and 1982, i.e., 730 million bottles to 1650 million bottles.

Guar Gum

Guar flour is obtained by grinding the endosperm of the seeds of guar plant, *cyamopsis teragonoloba*, which is a podbearing nitrogen fixing plant. This leguminous plant grows in the dry areas of the Punjab, Rajasthan, Uttar Pradesh and Gujarat. Commercial production of Guar Gum in India commenced in 1957, with the setting up of a factory at Bhiwani in Punjab.

Guar gum is now used for a large number of industrial purposes, namely, as a sizing and finishing agent in the textile and paper industries, and in the manufacture of cosmetics and pharmaceutical products. It is in good demand in the food industries as a stabiliser for ice cream and a base of reducing diets. The products of Guar gum has risen from 17,000 tonnes in 1975 to 33,000 tonnes in 1982. The demand for all the three grades of Guar Gum, namely food grade, technical grade and industrial grade, is likely to go up considerably in the coming years.

Processed foods are fast emerging as one of the leading items of export. The export performance during the last decade has shown a consistent and remarkable performance. From a modest amount of Rs. 24 crores in 1972-73, the exports have soared to Rs. 260 crores in 1982-83 and around Rs. 30 crores in 1983-84. The exports in 1984-85 are expected to fetch around Rs. 375 crores. The export performance of the processed foods industry between the years 1972-73 and 1982-83, is presented in Table 10.

TABLE 10

1982-83	..	300	260

Source : The Economic Times, July 27, 1983.

Among the processed/preserved food varieties, canned and bottled fruits, mango juice, pickles and chutneys, dehydrated vegetables and canned vegetables are the leading products of exports. During 1982-83, the export of these items picked up from Rs. 30 crores in 1981-82 to Rs. 63 crores; the U.S.S.R., is the main market for these products.

The export of processed foods is affected because of a large number of bottlenecks such as lack of infrastructure for transportation from hinterland areas, cold storage facilities and warehousing, as also high air freights. The freight in India is disproportionately high vis-a-vis that of competing countries, hence the competitive edge of the Indian processed foods industry is lost. Rationalisation of freight structure, liberal import policy (duty free import of machinery for modernisation) are some of the measures suggested for gearing up the challenge of exports of processed foods in the future.

Soaps and Detergents

The term 'detergent' includes both soaps and syndets (synthetic detergents) but in common parlance it is used to mean only synthetic cleaning compounds as distinguished from soaps. India is the largest producer of soaps and detergents in the world, with an annual production of about 10 lakh tonnes. About 3.5 lakh tonnes of toilet soaps are produced every year and this is entirely monopolised by the organised sector consisting of 44 units. Production of soaps in the organised sector increased from 3.28 lakh tonnes in 1981-82 to 3.42 lakh tonnes in 1982-83. Output of synthetic detergents in the organised sector at 1.69 lakh tonnes in 1982-83 was 4,000 tonnes more than that achieved in 1981-82. There are 19 units with an installed capacity of 2.51 lakh tonnes of synthetic detergents in the organised sector. Though the 5,200 units in the small scale sector contribute very little in the manufacture of toilet soaps, they account for 70 per cent of the total synthetic detergent soaps produced in the country.

Exports of soaps and detergents from India are meagre. The main purchasers of soaps and detergents from India are the USSR, Afghanistan, Nepal, the Gulf countries, Malaysia, Singapore and Thailand. However, some exports of soaps with special Indian perfumes such as sandalwood soaps, soaps based on herbal products etc. are being exported to countries like the USA, Australia, France, Finland etc.

Tyre Industry

The Indian Tyre Industry, producing every conceivable category of tyres as per world standards, is one of the major industries of the country. The development of the Indian tyre industry can be studied in three stages. During the pre-1960 period, the industry was dominated by manufacturing units established in India by the multinational tyre manufacturers namely, Dunlop and Firestone. The period 1970-75 saw the establishment of Indian-owned companies with technical and equity participation of foreign collaborators. This period saw the entry of a German manufacturer as a technical collaborator which was a marked change from the hitherto Anglo-American technological domination of the Indian tyre Industry. The hallmark of the post-1975 period was the gradual conversion of the tyre industry from the seller's market to the buyer's market and the tyre production for the years 1975 to 1982 saw an increase in production in almost all segments of th markete with the exception of passenger and off-the road tyres. The two-wheeler segment recorded a phenomenal growth of 120 per cent followed by farm tyres with 80 per cent growth.

The automotive tyres and tubes industry constitutes the largest segments of the rubber goods manufacturing industry. About 52 per cent of the rubber consumed in the country is used by the automotive tyres and tubes industry while cycle tyres and tubes account for about 14 per cent of the consumption. The tyre industry also uses more than 60 per cent of the total synthetic rubber output. At present there are 18 units engaged in the production of automobile tyres and tubes with a total installed capacity of 11.25 million per annum. Besides, further capacity to the extent of 15.71 million has also been approved by way of additional licences, letters of intent and registration with DGTD. The Industry has a turnover of nearly Rs. 1,300 crores.

The Indian Tyre Industry has made a steady progress as may be seen from the production figures in the table below.

TABLE 11

Tyre Production—1975-82 (in '000 nos.)

Category	1975	1976	1977	1978	1979	1980	1981	1982	% increase over '75

Source : Economic Times May 2, 1984.

Tyre production has increased from 4.6 million in 1971 to around 9 million in 1982. The year 1982, saw a 20 per cent increase in production against a 10 per cent rise in demand. Today, the Indian tyre is one of the best of its kind in the world. The performance of the conventional Crossply tyre especially has been a technological success ; this is evident from the fact that the failure rate due to incipient manufacturing defects have dropped from 16.8 per cent in 1975 to 5.2 per cent in 1982, while the initial mileage has recorded an increase of 13.5 per cent during the same period.

As the automobile tyre industry is facing a demand recession, it is quite unlikely that any new tyre unit will come up in the near future ; an economic unit in tyre industry is reckoned at a million tyre manufacturing capacity per annum and this would cost around Rs. 98 crores for a crossply conventional tyre plant, and around Rs. 130 crores for a radial tyre plant, assuming a product mix of truck tyres to passenger and smaller tyres at the ratio of 70 : 30. Anything less than a million tyre capacity would lead to underutilisation of equipment such as the dip machine and extruder, each of which costs around Rs. 3 crores.

Today, the tyre industry is standing at the crossroads of consolidation, development and growth on one side and declining productivity, recessionary trends, cut-throat competition, operational losses and its very survival on the other. Though tyre is one of the core sector industries of the country, very little attention is being paid by the Government to its problems. The foremost of these is the high cost of tyres produced by this industry. Between 1977 and 1982, the escalation in the cost of raw material was as follows: natural rubber 152 per cent, synthetic rubber 130 per cent, nylon 41 per cent, pigments and chemicals 60 per cent, beadwire 31 per cent and carbon black as much as 186 per cent. Moreover, the direct and indirect taxes paid by the industry amount to around Rs. 700 crores a year, which represents about 50 per cent of the industry's annual turnover. Hence it can be said that tyre is one of the most heavily taxed industries. This is the reason why tyre prices in India are considerably higher than elsewhere in the world. Between 1978 and 1982, the industry had to resort to increase in the price of all types of tyres sixteen times. As revealed by the following table, the maximum price increase was in the passenger tyre segment followed by the two wheeler segment and the heavy duty truck bus segment.

In order to spur the growth of Indian Tyre Industry the following steps are suggested ; (*a*) the tyre industry is a natural corollary of the two major industries in India (1) Vehicle manufacture and (2) Transport industry. These industries are basically interdependent on each other, but the tyre industy is dependent on both of them for its survival. Ameliorating conditions for any one of the three would have a pronounced effect on the other two. Though considerable excise relief has been granted to the vehicle manufacturers, the transport industry continues to be plagued with high operating costs and declining profitability besides tough competition from the railways. The Government should take efforts to streamline both these industries which would indirectly benefit the tyre industry. (*b*) the Government can help improve the economics of tyre manufacture by reducing the rate of excise duty, at least on a selective basis. Presently, the excise on tyres stands at 66 per cent. Inclusive of taxes on inputs, the total incidence of excise on a tyre works out to 119 per cent. (*c*) the Government can also help setting up of subsidised R&D Laboratories to cover research and develop suitable import substitutes as well as adopting Western technology on selective basis, to suit Indian conditions.

The country is now going through what may be called an ' Automobile Revolution '. Substantial capacity build up is taking place with the existing truck, light truck, passenger cars and two-wheelers manufacturers. This apart, new plants, are being set up with well-known international brand names to produce light trucks, passenger cars and two-wheelers. It is expected that in the next five years, truck production will go up by 50%, light truck by 100%, passenger cars by 125% and two wheelers by 100%. Hence the tyre industry has a bright future with substantial growth prospects.

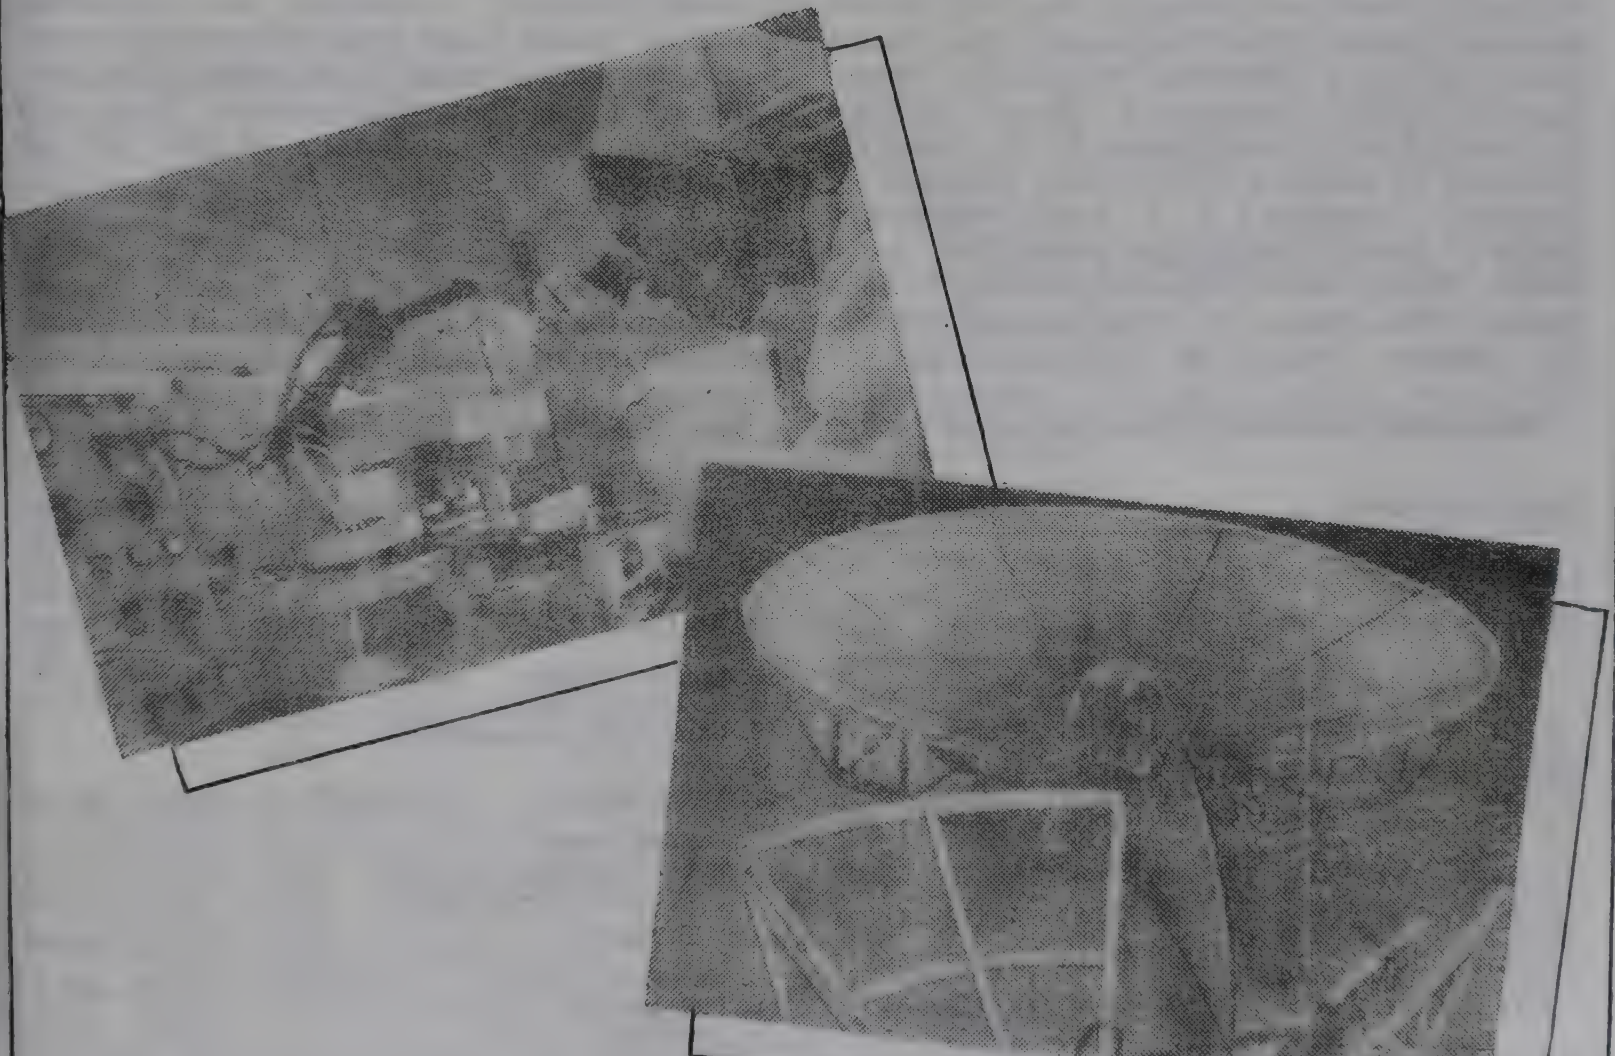
Since its inception in 1954, BEL has catalysed industrial advancement in India. Drawing constantly on contemporary technology, this leading electronics company develops and adapts it to Indian conditions. Accelerating industrial growth, especially in electronics.

The Development and Engineering divisions at BEL are committed to developing indigenous technology, and products, which are contemporary. Leading to achievements that make India proud.

BEL's four units manufacture equipment, components and systems for professional applications. All these are designed largely by its own D&E. The spirit of inquiry at BEL is active. Ever on the look-out for improved technologies and appropriate processes.

BEL's strength in design and production of equipment has given it the capability to take up communication systems on a turnkey basis. And thirty years as a pioneer and leader in professional electronics have resulted in BEL's capability to offer consultancy for setting up product lines. Helping India prove its electronics strengths to the world, again and again.

India's industrial capabilities. BEL has catalysed its phenomenal growth.



BEL - building India's future through electronics.

E.I.D. PARRY (INDIA) LTD.

(Formerly known as E.I.D. Parry Ltd.)

ESTABLISHED in 1975. **Directors :** M. V. Arunachalam (*Chairman*), B. P. Ray, S. L. N. Simha, S. Rangarajan, Dr. N. L. Hingorani (*Nominee* of State Bank of India), K. C. Ponnappa (IDBI *Nominee*), J. N. Guzder, P. K. Choksey, M. V. Murugappan and V. Krishnamurthy. **President :** K. V. Raghavan. **Secretary :** R. N. Ratnam. **Registered Office :** 'Dare House', Parry's Corner, Post Box No. 12, Madras-600 001. Telegrams : 'DISTIMULO'. Telex : 315. Telephones : 29251. **Auditors :** Messrs. Lovelock and Lewes.

Objects and Activities : Manufacture and sale of sugar, spirit carbonic acid gas, ceramics, chemicals, fertiliser mixtures, superphosphate, complex fertilisers, plant protection products, animal feeds, processed seeds, distribution of fertilisers, consumer and engineering products, assembling of generating sets and other products. Shipping, Transportation and tourist traffic are other servicing sections of the company's activity.

The fertiliser factory is at Ennore, the sugar factory is at Nellikuppam, South Arcot District, Madras with a crushing capacity of 4,000 tonnes of cane per day. The company also owns an IMFL unit at Jeedimetla, (A.P.). Three animal feed factories at Ennore, Tadepellagudam and Mysore produce different grades of cattle and poultry feeds. A wide range of sanitaryware and bazaarware are manufactured at Ranipet. Sanitaryware is marketed under the brand name of 'Parryware' vitreous. The tool room at Bangalore produces very high precision items and has been selected as an important supplier by Vikram Sarabhai Space Research Centre at Trivandrum for the manufacture of some highly sophisticated products.

Parry & Co. Ltd., The Moffussil warehouse and Trading Co. Ltd., Parry Murray & Co. Ltd., and Andhra Fertilisers Ltd. are the subsidiaries.

Breaking
into the secret world of
film-making.

There are only six companies
in the entire world
who make photographic films
right from start to finish.

HPF is one of them.

A roll of film is simple to look at but not simple to make.

Film manufacturing is a highly complex business requiring advanced technology, sophisticated manufacturing facilities and the highest standards of quality.

No wonder, there are only six completely integrated film manufacturing companies in the world! HPF is one of them

A whole industry in the dark

Film making is such a tough business that the bulk of the manufacturing process must be done in total darkness — in an atmosphere that is 100% dust-free. HPF has perfected these operations in the pollution-free atmosphere at Ooty. And trained a workforce to meet exacting requirements.

HPF has developed its own technology for critical processes. For manufacturing internationally renowned photo grade silver nitrate. And for synthesising chemicals and dyes for import substitution.

From total dependency to self-sufficiency

Despite the overwhelming complexity of the business HPF has done remarkably well.

From total dependance on imports to self reliance.

From teething problems of yesterday to a profitable company that works today to 180% of the original rated capacity.

From a conversion unit to a totally integrated production facility.

HPF today is a multi-product company, manufacturing photographic, cinematographic, lithographic, radiographic and industrial radiographic film. Film made with Indian knowhow, Indian materials and Indian expertise.

Film every Indian can be proud of.

The company that makes the largest range of tyres among Indian manufacturers isn't you-know-who ...

It's MRF

Truck tyres. Tank tyres. Vintage car tyres. Nylon car tyres. 500 different kinds of MRF tyres on the road today. And MRF going stronger than ever! The company that gave you Mansfield, the tyre with muscle, has crossed theRs. 200 crore mark. The largest Indian tyre manufacturer today. And now a new technical collaboration with B.F. Goodrich of the USA will bring more 'firsts' for the company with the largest range.

MRF TYRES

Tyres with Muscle
